<input type="checkbox"/> Grade C: Good	<input type="checkbox"/> Grade C: A great deal of	<input type="checkbox"/> Rejection
<input type="checkbox"/> Grade D: Fair	language polishing	<input type="checkbox"/> Minor revision
<input type="checkbox"/> Grade E: Poor	<input type="checkbox"/> Grade D: Rejected	<input type="checkbox"/> Major revision

JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

Considering the focus of this mini review is COVID-19 vaccination and diabetic ketoacidosis, the section of COVID-19 vaccination and diabetic ketoacidosis should be given more information. Currently this section was relative short compared to the Introduction. 1. Therefore, the authors are suggested to add one table to summarize the key information by separate T1D and T1D, 2. with more discussion for the following issues: (1) Are there differences for COVID-19 induced DCK between T1D and T2D? (2) How these difference or similar effects affect by gender? Age? With and without well glycaemia control? and etc.
