

PEER-REVIEW REPORT

Name of journal: *World Journal of Hepatology*

Manuscript NO: 82404

Title: Therapeutic possibilities of gut microbiota modulation in acute decompensation of liver cirrhosis

Provenance and peer review: Invited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05665395

Position: Peer Reviewer

Academic degree: MD

Professional title: Director, Professor

Reviewer's Country/Territory: China

Author's Country/Territory: Russia

Manuscript submission date: 2022-12-17

Reviewer chosen by: AI Technique

Reviewer accepted review: 2022-12-17 11:49

Reviewer performed review: 2022-12-26 00:58

Review time: 8 Days and 13 Hours

SPECIFIC COMMENTS TO AUTHORS

The formation of liver cirrhosis is an unfavorable event in the natural history of chronic liver diseases and with the development of portal hypertension and/or impaired liver function can cause a fatal outcome. Decompensation of liver cirrhosis is considered the most important stratification variable for the risk of death. It is not an interesting manuscript. Authors cannot succeed to present their idea in a clear way adding information to the existing literature. The text should be supplemented with clear illustrations

SPECIFIC COMMENTS TO AUTHORS

The article is well-written and directs you to up-to-date concepts. There is a need for some minor English polishing.
