	General Information of the Manuscript	
	Name of journal: World Journal of Clinical Cases	
	Manuscript NO.: 82431	
	Column: Minireviews	
1	<b>Title:</b> Current research of idiopathic normal pressure hydrocephalus:	[Y]
	pathogenesis, diagnosis and treatment.	
	Authors: Tetsuro Ishida, Tomonori Murayama and Seiju Kobayashi	
	<b>Reviewer code:</b> 06333260, and 02830107	
	First decision: 2023-01-20 00:48	
2	Editorial Office's Comments	[Y]

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	Science Editor:	
	The manuscript has been peer-reviewed, and it's ready for the first de	
	cision.	
	Company Editor-in-Chief: I have reviewed the Peer-Review Report,	
	the full text of the manuscript, and the relevant ethics documents, all	
	of which have met the basic publishing requirements of the World	
	Journal of Clinical Cases, and the manuscript is conditionally	
	accepted. I have sent the manuscript to the author(s) for its revision	
	according to the Peer-Review Report, Editorial Office's comments and	
	the Criteria for Manuscript Revision by Authors. Before final	
	acceptance, the author(s) must add a table/figure to the manuscript.	
	There are no restrictions on the figures (color, B/W) and tables.	
	Before final acceptance, when revising the manuscript, the author	
	must supplement and improve the highlights of the latest cutting-edge	
	research results, thereby further improving the content of the	
	manuscript. To this end, authors are advised to apply a new tool, the	
	RCA. RCA is an artificial intelligence technology-based open	
	multidisciplinary citation analysis database. In it, upon obtaining	
	search results from the keywords entered by the author, "Impact Index	
	Per Article" under "Ranked by" should be selected to find the latest	
	highlight articles, which can then be used to further improve an article	
	under preparation/peer-review/revision. Please visit our RCA	
	database for more information at:	
	https://www.referencecitationanalysis.com/.	
3	The fixed headings are copied.	[Y]
4	The title concisely summarizes the main topic of the study and is not	[Y]

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	too long (no more than 18 words). Words such as 'exploration',	
	'research', 'analysis', 'observation', and 'investigation' are avoided.	
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first names	[Y]
6	are listed on the title page and are consistent with those listed in the	
	signed BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	[Y]
	contribution(s) made by each author. The author's names are listed in	
	the following format: full family (sur)name followed by abbreviated	
	first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	
	research study; Wang CL, Zou CC, Hong F and Wu XM performed the	
	research; Xue JZ and Lu JR contributed new reagents and analytic	
	tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL,	
	Liang L and Fu JF wrote the manuscript. All authors have read and	
	approve the final manuscript."	
	The 'Supported by' statement describes the source(s) of financial	
8	support and includes the corresponding identification number(s) and	[N]
	program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	[Y]
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address	
	(including zip code) and e-mail (written in all lowercase), and contains	
	no spelling errors.	
	The Manuscript Tracking information (i.e., Received, Peer review	[Y]
10	started, First decision, Revised, Accepted, Article in press, and	
10	Published online) are provided along with the corresponding editor	
	1 donistica offinic) are provided along with the corresponding editor	

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	and date for each item, and contain no spelling errors.	
11	The Abstract section is formatted according to the article-specific style (structured <i>vs</i> unstructured) and word count thresholds, as follows:  Commentary, Frontier, Diagnostic Advances, Medical Ethics,  Minireview, Review, Therapeutics Advances, and Topic Highlight:  Non-structured abstract that is no less than 200 words.  Field of Vision, Case Report and Letter to the Editor: Non-structured abstract that is no less than 150 words.  Research articles: Structured abstract with subsections for AIM (no more than 20 words); METHODS (no less than 80 words); RESULTS (no less than 120 words); and CONCLUSION (no more than 26 words).	[Y]
12	The 'Key words' list provides 5-10 keywords that reflect the main content of the study. The first letter of each keyword is capitalized, and each keyword is separated by a semicolon.	[Y]
13	The "citation" contains authors' names and manuscript title. The name of the first author should be typed in bold letters; the family (sur) name of all authors should be typed with the first letter capitalized, followed by their abbreviated first and middle initials. For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM, Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes mellitus increases the risk of gastric cancer: A meta-analysis. <i>World J Gastroenterol</i> 2019; In press	[Y]
14	The 'Core tip' provides a summary (less than 100 words) of the study that outlines the most innovative and important arguments and core contents of the paper and will serve to effectively attract readers.	[Y]

The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations are explained and/or defined, with the full name of abbreviations given upon first appearance in the text and the abbreviation presented in parentheses [i.e., "computed tomography (CT)"]. First-person pronouns (e.g., 'T., 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.  The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.  The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (i.e., chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.  Statistical symbols are accurate. Statistical significance is expressed as *P < 0.05, *P < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values is expressed as *P < 0.05 and *P < 0.01 are used, and a third series of P values is expressed as *P < 0.05 and *P < 0.01. Statistical data is expressed as mean ± SD or mean ± SE.		T

If there are other series of $P$ values, c $P < 0.05$ and d $P < 0.01$ are used, and a third series of $P$ values is expressed as c $P < 0.05$ and d $P < 0.01$ .		described in textual form are accurate, concise and clear.	
there are other series of $P$ values, $^cP < 0.05$ and $^dP < 0.01$ are used, and a third series of $P$ values is expressed as $^eP < 0.05$ and $^dP < 0.01$ .		Statistical symbols are accurate. Statistical significance is expressed as	[Y]
a third series of $P$ values is expressed as ${}^{\rm e}P$ < 0.05 and ${}^{\rm f}P$ < 0.01.		$^{\mathrm{a}}P$ < 0.05, $^{\mathrm{b}}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted). If	
-	18	there are other series of $P$ values, $^{c}P$ < 0.05 and $^{d}P$ < 0.01 are used, and	
Statistical data is expressed as mean ± SD or mean ± SE.		a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.	
		Statistical data is expressed as mean ± SD or mean ± SE.	

		F3/1
	The 'DISCUSSION' section (1) describes the main purpose and	[Y]
	hypothesis of the study; (2) summarizes the most important results; (3)	
	illustrates and explains the results (but does not simply repeat the	
19	data) and draws conclusions or inferences based on the results; (4)	
	points out the limitations of the study and their impact on the results,	
	as well as proposes further advice on future research topic(s) or	
	direction(s); and (5) describes the theoretical significance and practical	
	value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
	individuals or organizations for technical support (i.e., providing	
20	instrumentation, equipment or experimental materials, and/or	f > 7 1
20	assistance in experimental work), non-technical services (i.e., useful	[ N ]
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
21	The 'ARTICLE HIGHLIGHTS' section provides comments for original	[NI]
21	articles in accordance with the specified format.	[N]
	The 'REFERENCES' section lists the references in the Vancouver style.	[Y]
	This style uses Arabic numeral in-text citations based on the order of	
	the first appearance of a source in the text. For citations where the	
	author's name is indicated in the text, a superscript number should be	
22	placed following the name (i.e, "Pang et al"). For citations where no	
	author is indicated, a superscript number should be placed at the end	
	of the sentence. Respective examples are: "Ma[1] reported", "Pan et	
	al <sup>[2-5]</sup> indicated"; "PCR has a high sensitivity <sup>[6,9]</sup> ." No superscript	
	numbers are used when the reference number is described in the text;	
	for example, "The experimental method used has been described in	
	reference [8]." The style of reference citations in tables is the same as	
	that in the text (e.g., Pan et $al^{[2-5]}$ , please see reference [8]).	

Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version.  The number of cited references is appropriate for the article type, as follows:  Commentary: no less than 50;  Review: no less than 100;  Article: no less than 30/26;  Case Report and Letter to the Editor: no less than 1.  The ethics-related statements are provided in accordance with the manuscript type (e.g., Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, etc.).  The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL).  The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, x, *, *, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A:;  B:; C:; D:; E:; F:  Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis diagrams, PCR amplification curves, and survival curves.
