	Science Editor: Remind Revision at 2023-01-17 08:18	
	Company Editor-in-Chief: I have reviewed the Peer-Review	
	Report, the full text of the manuscript, and the relevant ethics	
	documents, all of which have met the basic publishing requirements	
	of the World Journal of Clinical Cases, and the manuscript is	
	conditionally accepted. I have sent the manuscript to the author(s)	
	for its revision according to the Peer-Review Report, Editorial	
	Office's comments and the Criteria for Manuscript Revision by	
	Authors. Before final acceptance, the author(s) must add a	
	table/figure to the manuscript. There are no restrictions on the	
	figures (color, B/W) and tables. Before final acceptance, when	
	revising the manuscript, the author must supplement and improve	
	the highlights of the latest cutting-edge research results, thereby	
	further improving the content of the manuscript. To this end,	
	authors are advised to apply a new tool, the RCA. RCA is an	
	artificial intelligence technology-based open multidisciplinary	
	citation analysis database. In it, upon obtaining search results from	
	the keywords entered by the author, "Impact Index Per Article"	
	under "Ranked by" should be selected to find the latest highlight	
	articles, which can then be used to further improve an article under	
	preparation/peer-review/revision. Please visit our RCA database	
	for more information at:	
	https://www.referencecitationanalysis.com/.

All authors have read and approve the final manuscript."  The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors. 	The 'INTRODUCTION' section clearly describes the relevant		
	background information for the study. Only the most relevant and		
	current (within the past 5 years) literature is cited, with the		
	exception of rare instances of seminal literature citations. All		
	technical terms and/or abbreviations are explained and/or defined,		
45	with the full name of abbreviations given upon first appearance in	[3/]	
15	the text and the abbreviation presented in parentheses [i.e.,	[Y]	
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',		
	'we') are used appropriately to clearly indicate the work performed		
	by the author(s). When weaknesses of previous studies are		
	described in the text to highlight the innovations related to the		
	current study, the information is presented carefully.		
	The 'MATERIALS AND METHODS' section clearly and accurately		
4.6	describes all materials and methods used to obtain the data	[N]	
16	presented in the article and is adequate for a reader to repeat the		
	study.		
	The 'RESULTS' section concisely describes the observational and		
	experimental results. Representative data and data that have		
	scientific significance are emphasized. Data is presented in either		
17	the text, a table or figure (i.e., chart, diagram, graph or image), but is	[N]	
	not repeated among each. Information presented in the tables and		
	figures clearly describes the trends, meaning, and inferences.		
	Results described in textual form are accurate, concise and clear.		
	Statistical symbols are accurate. Statistical significance is expressed		
18	as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted).		
	If there are other series of <i>P</i> values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	[N]

	The 'DISCUSSION' section (1) describes the main purpose and		
	hypothesis of the study; (2) summarizes the most important results;		
	(3) illustrates and explains the results (but does not simply repeat		
10	the data) and draws conclusions or inferences based on the results;	[3/]	
19	(4) points out the limitations of the study and their impact on the	[Y]	
	results, as well as proposes further advice on future research		
	topic(s) or direction(s); and (5) describes the theoretical significance		
	and practical value of the findings.		
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any		
	individuals or organizations for technical support (i.e., providing		
20	instrumentation, equipment or experimental materials, and/or	****	
20	assistance in experimental work), non-technical services (i.e., useful	[N]	
	inspiration, suggestions, guidance, or review), and/or any other		
	auxiliary work.		
01	The 'ARTICLE HIGHLIGHTS' section provides comments for	[AT]	
21	original articles in accordance with the specified format.	[ N ]	
	The 'REFERENCES' section lists the references in the Vancouver		
	style. This style uses Arabic numeral in-text citations based on the		
	order of the first appearance of a source in the text. For citations		
	where the author's name is indicated in the text, a superscript		
	number should be placed following the name (i.e, "Pang et al"). For		
	citations where no author is indicated, a superscript number should		
22	be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup>	[Y]	
	reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a high		
	sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the		
	reference number is described in the text; for example, "The		
	experimental method used has been described in reference [8]." The		
	style of reference citations in tables is the same as that in the text		
	(e.g., Pan et al <sup>[2-5]</sup> , please see reference [8]).
