

Since our randomized trial was of a nursing intervention only, it was not an official randomized control clinical trial that needed registering on a national level.

However, this research was supported by the Clinical Research Center/Center for Clinical Research Management of The Ohio State University Wexner Medical Center and The Ohio State University College of Medicine in Columbus, Ohio. The project was entitled “GASTR29: Prospective validation of readmission risk score and interventions to prevent readmission in patients with decompensated cirrhosis (CCTS ID#: 6018)”.

This project was funded by the Ohio State University Self Insurance Program and supported by NIH Award Number UL1TROO2733 from the National Center for Advancing Translational Science.

Please let me know what questions you have,

Antoinette Pusateri, MD
