| Science Editor: The edited manuscript has been sent to authors for proofreading.Company Editor-in-Chief: I recommend the manuscript to be published in the World Journal of Clinical Cases. Before final acceptance, when revising the manuscript, the author must supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply a new tool, the Reference Citation Analysis (RCA). RCA is an artificial intelligence technology-based open multidisciplinary citation analysis database. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can then be used to further improve an article under preparation/peer-review/revision. Please visit our RCA database for more information at: https://www.referencecitationanalysis.com/.[Y]3The fixed headings are copied.[Y]4'research', 'analysis', 'observation', and 'investigation' are avoided. The title does not start with 'The' and does not include any Arabic numbers or uncommon abbreviations.[Y]5A short running title is provided (no more than 6 words).[Y] | | |

| 7 | The 'Author contributions' passage describes the specific contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names. <i>e.g.,</i> "Wang CL and Liang L contributed equally to this work; Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and | [Y] |
|----|--|-----|
| | Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript." | |
| 8 | The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors. | [N] |
| 9 | The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title (<i>e.g.</i> , MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors. | [Y] |
| 10 | The Manuscript Tracking information (<i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors. | [Y] |
| 11 | The Abstract section is formatted according to the article-specific style (structured <i>vs</i> unstructured) and word count thresholds, as follows: <u>Commentary, Frontier, Diagnostic Advances, Medical Ethics,</u> <u>Minireview, Review, Therapeutics Advances, and Topic Highlight</u> : Non-structured abstract that is no less than 200 words. <u>Field of Vision, Case Report and Letter to the Editor</u> : | [Y] |

| | Non-structured abstract that is no less than 150 words. | |
|----|---|------|
| | Research articles: Structured abstract with subsections for AIM (no | |
| | more than 20 words); METHODS (no less than 80 words); RESULTS | |
| | (no less than 120 words); and CONCLUSION (no more than 26 | |
| | words). | |
| | The 'Key words' list provides 5-10 keywords that reflect the main | |
| 12 | content of the study. The first letter of each keyword is capitalized, | [Y] |
| | and each keyword is separated by a semicolon. | |
| | The "citation" contains authors' names and manuscript title. The | |
| | name of the first author should be typed in bold letters; the family | |
| | (sur) name of all authors should be typed with the first letter | |
| | capitalized, followed by their abbreviated first and middle initials. | |
| 13 | For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick | [Y] |
| | Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM, | |
| | Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes | |
| | mellitus increases the risk of gastric cancer: A meta-analysis. World J | |
| | Gastroenterol 2019; In press | |
| | The 'Core tip' provides a summary (less than 100 words) of the | |
| 14 | study that outlines the most innovative and important arguments | 52/3 |
| 14 | and core contents of the paper and will serve to effectively attract | [Y] |
| | readers. | |
| | The 'INTRODUCTION' section clearly describes the relevant | |
| 15 | background information for the study. Only the most relevant and | |
| | current (within the past 5 years) literature is cited, with the | |
| | exception of rare instances of seminal literature citations. All | |
| | technical terms and/or abbreviations are explained and/or defined, | [Y] |
| | with the full name of abbreviations given upon first appearance in | |
| | the text and the abbreviation presented in parentheses [i.e., | |
| | "computed tomography (CT)"]. First-person pronouns (e.g., 'I', | |
| | 'we') are used appropriately to clearly indicate the work performed | |
| L | | |

| | by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully. | |
|----|---|-----|
| 16 | The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study. | [N] |
| 17 | The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (<i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear. | [N] |
| 18 | Statistical symbols are accurate. Statistical significance is expressed as ${}^{a}P < 0.05$, ${}^{b}P < 0.01$ ($P > 0.05$ usually does not need to be denoted). If there are other series of P values, ${}^{c}P < 0.05$ and ${}^{d}P < 0.01$ are used, and a third series of P values is expressed as ${}^{e}P < 0.05$ and ${}^{f}P < 0.01$. Statistical data is expressed as mean ± SD or mean ± SE. | [N] |

| | - | |
|----|--|------|
| | The 'DISCUSSION' section (1) describes the main purpose and | |
| | hypothesis of the study; (2) summarizes the most important results; | |
| | (3) illustrates and explains the results (but does not simply repeat | |
| 10 | the data) and draws conclusions or inferences based on the results; | D.L. |
| 19 | (4) points out the limitations of the study and their impact on the | [N] |
| | results, as well as proposes further advice on future research | |
| | topic(s) or direction(s); and (5) describes the theoretical significance | |
| | and practical value of the findings. | |
| | The 'ACKNOWLEDGEMENTS' section expresses gratitude to any | |
| | individuals or organizations for technical support (i.e., providing | |
| | instrumentation, equipment or experimental materials, and/or | |
| 20 | assistance in experimental work), non-technical services (i.e., useful | [N] |
| | inspiration, suggestions, guidance, or review), and/or any other | |
| | auxiliary work. | |
| 01 | The 'ARTICLE HIGHLIGHTS' section provides comments for | [N] |
| 21 | original articles in accordance with the specified format. | |
| | The 'REFERENCES' section lists the references in the Vancouver | |
| | style. This style uses Arabic numeral in-text citations based on the | |
| | order of the first appearance of a source in the text. For citations | |
| | where the author's name is indicated in the text, a superscript | |
| | number should be placed following the name (<i>i.e.,</i> "Pang <i>et al</i> "). For | |
| | citations where no author is indicated, a superscript number should | |
| 22 | be placed at the end of the sentence. Respective examples are: "Ma ^[1] | [Y] |
| | reported", "Pan et al ^[2-5] indicated"; "PCR has a high | |
| | sensitivity ^[6,9] ." No superscript numbers are used when the | |
| | reference number is described in the text; for example, "The | |
| | experimental method used has been described in reference [8]." The | |
| | style of reference citations in tables is the same as that in the text | |
| | (e.g., Pan et al ^[2-5] , please see reference [8]). | |
