SPECIFIC COMMENTS TO AUTHORS

Dear Authors, this is a well-written manuscript, presenting an interesting case of a rare condition, which is the eosinophilic enteritis and its differentiation from CEAS. Please pay attention to the following questions and queries, pertaining to your manuscript: 1. According to Line 66, the patient presented with hemoglobin of 2.9 g/dL. This comes in contrast with the line 87, where the blood test analysis on admission revealed Hb 9.7g/dL. Please explain. Was there a red blood transfusion in between? 2. Line 117: please explain why you used montelukast as a monotherapy to reach remission and/or not local corticosteroids, like budesonide? Best Regards
