

ANSWERING REVIEWERS

Dear Editor at World Journal of Clinical Cases,

We want to express our gratefulness for Your fast response and the reviewers' time, the received reviews and a good evaluation You have given to our manuscript, called: "Crohn's Disease In Hiv-Infected Patient: A Case Report And A Literature Review".

We have adressed the reviewers' comments and revised our manuscript accordingly. Now we are ready to submit the revised version.

Below we present our responses to every reviewer.

ANSWER TO REVIEWERS

Dear Reviewer #1 (*"It is an interesting manuscript. Authors can succeed to present their idea in a clear way adding information to the existing literature."*),

We sincerely thank You for noticing the impact of our case report. We will polish the language as You have suggested.

Dear Reviewer #2 (*"the author present a case of a middle-aged female with CD and HIV comorbidity to improve knowledge of this rare and understudied interrelation of these two conditions. The lack of studies and data about HIV and IBD coinfection leaves clinicians doubting the optimal treatment options. This report reminds of the importance of early diagnostics and discusses specific treatment and prophylactic guidelines when both diseases are present to prevent a variety of complications.this is a good case report."*),

We are pleased to see Your comment, thank You for the observation. We do desire to raise awareness of such rare cases of coinfection and their treatment in order to help other professionals who face these challenges. Also, we will properly improve our case report language.
