SPECIFIC COMMENTS TO AUTHORS

I congratulate the authors on their very good work. The article merits consideration for publishing. However it requires improvement in writing style and there are some ortographical errors. A few phrases are even hard to understand. I suggest using a professional editing service or requiring revision from a native english-speaking country reviewer. I will give you one example: "Several studies have reported invasive aspergillosis among 1-15% of organ ..." -> consider changing to "Several studies reported rates of invasive aspergillosis of around 1% to 15% of organ transplant recipients" Another issue is the introduction of the article. It should be more concise. A relevant part of the introduction should be moved to the discussion section.
