Item No.	Specific items for verification	Yes=[Y]
		No= [N]
	General Information of the Manuscript	
	Name of journal: World Journal of Gastroenterology	
	Manuscript NO.: 87419	
	Column: Clinical Trials Study	
	Title: Machine Learning Identifies the Risk of Complications after	
1	Laparoscopic Radical Gastrectomy for Gastric Cancer	[Y]
	Authors: Qingqi Hong, Su Yan, Yong-Liang Zhao, Lin Fan, Li Yang,	
	Wenbin Zhang, Hao Liu, Hexin Lin, Jian Zhang, Zhijian Ye, Xian	
	Shen, Li-Sheng Cai, Guowei Zhang, Jiaming Zhu, Gang Ji, Jinping	
	Chen, Wei Wang, Zhengrong Li, Jingtao Zhu, Guo-Xin Li and Jun	
	You	

	<b>Reviewer code:</b> 03731081, and 06082695	
	First decision: 2023-09-23 22:26	
	Editorial Office's Comments	
	Science Editor: Remind Revision at 2023-10-01 08:18	
	Company Editor-in-Chief: I have reviewed the Peer-Review	
	Report, the full text of the manuscript, and the relevant ethics	
	documents, all of which have met the basic publishing requirements	
	of the World Journal of Gastroenterology, and the manuscript is	
	conditionally accepted. I have sent the manuscript to the author(s)	
	for its revision according to the Peer-Review Report, Editorial	
	Office's comments and the Criteria for Manuscript Revision by	
	Authors. Before final acceptance, uniform presentation should be	
	used for figures showing the same or similar contents; for example,	
2	"Figure 1Pathological changes of atrophic gastritis after treatment.	[Y]
	A:; B:; C:; D:; E:; F:; G:". Please provide	
	decomposable Figures (in which all components are movable and	
	editable), organize them into a single PowerPoint file. Please check	
	and confirm whether the figures are original (i.e. generated de novo	
	by the author(s) for this paper). If the picture is 'original', the author	
	needs to add the following copyright information to the bottom	
	right-hand side of the picture in PowerPoint (PPT): Copyright ©The	
	Author(s) 2022. However, the quality of the English language of the	
	manuscript does not meet the requirements of the journal. Before	
	final acceptance, the author(s) must provide the English Language	
	Certificate issued by a professional English language editing	

# Baishideng **Publishing**

7041 Koll Center Parkway, Suite 160, Pleasanton, CA 94566, USA **Telephone:** +1-925-399-1568 E-mail: office@baishideng.com https://www.wjgnet.com

company. Please visit the following website for the professional English language editing companies we recommend: https://www.wjgnet.com/bpg/gerinfo/240. final Before acceptance, when revising the manuscript, the author must supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply a new tool, the Reference Citation Analysis (RCA). RCA is an artificial intelligence technology-based open multidisciplinary citation analysis database. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can then be used to further improve an article under preparation/peer-review/revision. Please visit our RCA database for more information at: https://www.referencecitationanalysis.com/. Before its final acceptance, please provide and upload the following important documents: Biostatistics Review Certificate, a statement affirming that the statistical review of the study was performed by a biomedical statistician; Clinical Trial Registration Statement, an important document required for any clinical research study that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects on health outcomes; Institutional Review Board Approval Form or Document, the primary version (PDF) of the Institutional Review

	Decade official annual momentation that official have a first	
	Board's official approval, prepared in the official language of the	
	authors' country; Signed Informed Consent Form(s) or	
	Document(s), the primary version (PDF) of the Informed Consent	
	Form that has been signed by all subjects and investigators of the	
	study, prepared in the official language of the authors' country;	
	CONSORT 2010 Statement, an important document related to	
	manuscript writing of clinical trial, randomized controlled trial, and	
	randomized clinical trial research, and prospective studies.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	[Y]
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	
6	names are listed on the title page and are consistent with those	[Y]
	listed in the signed BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	[Y]
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	the research; Xue JZ and Lu JR contributed new reagents and	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
	Wang CL, Liang L and Fu JF wrote the manuscript. All authors	
	have read and approve the final manuscript."	
·	I	

	The 'Supported by' statement describes the source(s) of financial	
8	support and includes the corresponding identification number(s)	[Y]
	and program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address	[Y]
	(including zip code) and e-mail (written in all lowercase), and	
	contains no spelling errors.	
	The Manuscript Tracking information (i.e., Received, Peer review	
10	started, First decision, Revised, Accepted, Article in press, and	D/I
10	Published online) are provided along with the corresponding editor	[Y]
	and date for each item, and contain no spelling errors.	
	The Abstract section is formatted according to the article-specific	
	style (structured vs unstructured) and word count thresholds, as	
	follows:	
	Commentary, Frontier, Diagnostic Advances, Medical Ethics,	
	Minireview, Review, Therapeutics Advances, and Topic Highlight:	
	Non-structured abstract that is no less than 200 words.	D.C.
11	Field of Vision, Case Report and Letter to the Editor:	[Y]
	Non-structured abstract that is no less than 150 words.	
	Research articles: Structured abstract with subsections for AIM (no	
	more than 20 words); METHODS (no less than 80 words); RESULTS	
	(no less than 120 words); and CONCLUSION (no more than 26	
	words).	
12	The 'Key words' list provides 5-10 keywords that reflect the main	
	content of the study. The first letter of each keyword is capitalized,	[Y]
	and each keyword is separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The	
13	name of the first author should be typed in bold letters; the family	[Y]
	(sur) name of all authors should be typed with the first letter	

	capitalized, followed by their abbreviated first and middle initials.	
	For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	
	Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,	
	Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
	mellitus increases the risk of gastric cancer: A meta-analysis. World J	
	Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the	
14	study that outlines the most innovative and important arguments	D.C.
14	and core contents of the paper and will serve to effectively attract	[Y]
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
	with the full name of abbreviations given upon first appearance in	
15	the text and the abbreviation presented in parentheses [i.e.,	[Y]
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	
16	describes all materials and methods used to obtain the data	
	presented in the article and is adequate for a reader to repeat the	[Y]
	study.	

deng 160, Ple ning E-mail https:/

17The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.[M]18Statistical symbols are accurate. Statistical significance is expressed as <sup>3</sup> P < 0.05, <sup>1</sup> P < 0.01 (P > 0.05 usually does not need to be denoted). If there are other series of P values, 'P < 0.05 and <sup>4</sup> P < 0.01 are used, and a third series of P values is expressed as <sup>c</sup> P < 0.05 and <sup>4</sup> P < 0.01. Statistical data is expressed as mean ± SD or mean ± SE.[M]19The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.[M]20The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical services ( <i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.[M]21The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.[M]			
figures clearly describes the trends, meaning, and inferences.         Results described in textual form are accurate, concise and clear.         Statistical symbols are accurate. Statistical significance is expressed as <sup>a</sup> P < 0.05, <sup>b</sup> P < 0.01 (P > 0.05 usually does not need to be denoted).         18       If there are other series of P values, <sup>c</sup> P < 0.05 and <sup>d</sup> P < 0.01 are used, and a third series of P values is expressed as <sup>e</sup> P < 0.05 and <sup>d</sup> P < 0.01.	17	experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is	[Y]
18       as *P < 0.05, *P < 0.01 (P > 0.05 usually does not need to be denoted).       [Y]         18       If there are other series of P values, *P < 0.05 and *P < 0.01 are used, and a third series of P values is expressed as *P < 0.05 and *P < 0.01.		figures clearly describes the trends, meaning, and inferences.	
<ul> <li>hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.</li> <li>The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i>, providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i>, useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.</li> <li>The 'ARTICLE HIGHLIGHTS' section provides comments for</li> </ul>	18	as ${}^{a}P < 0.05$ , ${}^{b}P < 0.01$ ( $P > 0.05$ usually does not need to be denoted). If there are other series of $P$ values, ${}^{c}P < 0.05$ and ${}^{d}P < 0.01$ are used, and a third series of $P$ values is expressed as ${}^{e}P < 0.05$ and ${}^{f}P < 0.01$ .	[Y]
20 individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services ( <i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work. 21 The 'ARTICLE HIGHLIGHTS' section provides comments for	19	hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance	[Y]
	20	individuals or organizations for technical support ( <i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services ( <i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other	[N]
	21	-	[Y]

	The 'REFERENCES' section lists the references in the Vancouver	
	style. This style uses Arabic numeral in-text citations based on the	
	order of the first appearance of a source in the text. For citations	
	where the author's name is indicated in the text, a superscript	
	number should be placed following the name ( <i>i.e.</i> , "Pang <i>et al</i> "). For	
	citations where no author is indicated, a superscript number should	
22	be placed at the end of the sentence. Respective examples are: " $Ma^{[1]}$	[Y]
	reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a high	
	sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the	
	reference number is described in the text; for example, "The	
	experimental method used has been described in reference [8]." The	
	style of reference citations in tables is the same as that in the text	
	( <i>e.g.</i> , Pan <i>et al</i> <sup>[2-5]</sup> , please see reference [8]).	
	Journal references have been verified to ensure that there are no	
	duplicate references and that the PMID numbers are correct. For	[Y]
	references not yet included in PubMed: the name of Chinese	
22	journals is spelled out using Chinese Pinyin, with the first letter of	
23	each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of	
	journals in other languages are listed according to indexing	
	information retrieved from Google. Book references are presented	
	with all the information relevant to the electronic version.	
	The number of cited references is appropriate for the article type, as	
24	follows:	[Y]
	<u>Commentary:</u> no less than 50;	
	<u>Review:</u> no less than 100;	
	<u>Article:</u> no less than 30/26;	
	Case Report and Letter to the Editor: no less than 1.	
	The ethics-related statements are provided in accordance with the	
	manuscript type (e.g., Manuscript NoInstitutional review board	[Y]
	statement, Manuscript NoAnimal care and use statement, etc.).	
L	·	

	The names of the peer reviewers and the scientific editor are present	
26	at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang	[Y]
	JL).	
	The order and numerical labeling of tables and figures is consistent	
	with their appearance and presentation in the text. Symbols in	
	tables (e.g., +, -, ×, $\div$ , *) correctly correspond to the definitions in the	
27	footnotes. Only one legend is provided for each multi-panel figure	[N/]
27	consisting of color graphs, black and white graphs, or line graphs	[Y]
	that depicts data of the same theme. For example: Figure 1	
	Pathological changes in atrophic gastritis tissue before and after	
	treatment. A:; B:; C:; D:; E:; F:	
	Split pictures include flow charts, line graphs, histograms, and	
28	graphs including text. Unsplit pictures include meta-analysis	[Y]
	diagrams, PCR amplification curves, and survival curves.	
•••	The author(s) highlighted the changes made to the manuscript	[Y]
29	according to the peer-reviewers' comments.	
20	The responses to the peer-reviewers' comments are consistent with	[Y]
30	the changes made to the manuscript.	
	The revised manuscript is provided (file name: Manuscript	
	NoReview; <i>e.g.</i> , 870- Review).	
	The letter of peer-reviewers' comments is provided (file name:	
31	Manuscript NoPeer-review(s); <i>e.g.</i> , 870-Peer-review(s)).	[Y]
	The response letter is provided (file name: Manuscript	
	NoAnswering reviewers; <i>e.g.</i> , 870-Answering reviewers).	
	The related ethics and relevant documents are provided, such as (1)	
	Approved grant application form(s) or funding agency copy of any	
	approval document(s) (file name: Manuscript NoGrant application	<b>1</b> 11
32	form(s)); (2) Biostatistics review certificate (file name: Manuscript	[Y]
	NoBiostatistics statement); (3) Conflict-of-interest statement (file	
	name: Manuscript NoConflict-of-interest statement); (4) Clinical	

	trial registration statement (file name: Manuscript NoClinical trial	
	registration statement); (5) Institutional review board approval form	
	or document (file name: Manuscript NoInstitutional review board	
	statement); (6) Institutional animal care and use committee	
	approval form or document (file name: Manuscript	
	NoInstitutional animal care and use committee statement), and (7)	
	Signed informed consent form(s) or document(s) (file name:	
	Manuscript NoInformed consent statement).	
	All authors signed the BPG Copyright license agreement form (file	
33	name: Manuscript NoCopyright license agreement; e.g.,	[Y]
	870-Copyright license agreement).	
	The language certificate provided by authors who are non-native	
34	speakers of English meets the BPG requirements (file name:	[Y]
	Manuscript NoLanguage certificate; <i>e.g.</i> , 870-Language certificate).	
	The photos licensed in the Agreement for Use of Personal Photos	
25	are consistent with those in the paper (file name: Manuscript	D. T
35	NoAgreement for use of personal photos; e.g., 870-Agreement for	[N]
	use of personal photos).	
	This document (Checklist of Responsibilities for Scientific Editors)	
36	has been saved under the file name: manuscript NoScientific	[Y]
	editor work list (e.g., 870-Scientific editor work list).	
	A CrossCheck investigation (an effective tool for detecting unoriginal	
	content, enabling our editors to preserve the journal's integrity and	
	the authors' copyright) has been performed for the manuscript via	
	the website: http://www.ithenticate.com/. The results document	
37	contains the following information for the manuscript: "Name of	[Y]
	journal", "Manuscript No.", "Columns", "Title" and "Author list".	
	The Figure of the <i>CrossCheck</i> results is saved in JPEG format (.jpg) at	
	1440 $\times$ 680 pixel resolution. The PDF of the <i>CrossCheck</i> results has	
	been saved under the file name: manuscript No CrossCheck report	

	(e.g., 870-CrossCheck report). The Google searches have also been			
	performed to further ensure publication of original content.			
38	The text of the manuscript is typed in Book Antiqua font, 12 pt, with	[Y]		
	1.5 line spacing.			
	The primary responsibilities of our scientific editors include carefull	y checking the		
Deepongibilities	entire manuscript and all accompanying materials for: (1) error	rs in spelling,		
Responsibilities	grammar, punctuation and wording; (2) suitability of tables, figures, f	igure data and		
of scientific	legends; (3) accurate and appropriate presentation of symbols (e.g. +, -, $\times$ , $\div$ , %, *) in			
editors	tables and figures; and (4) complete and comprehensive revision of the manuscrit			
	according to the reviewers' comments.			
	Manuscript reception and registration→Initial review by scientific editor→Peer			
	review $\rightarrow$ End of peer review $\rightarrow$ First round of meeting evaluation $\rightarrow$ To			
	accepted $\rightarrow$ Revision by the author(s) $\rightarrow$ Second round of meeting evaluation $\rightarrow$ To b			
	accepted/revised/rejected→Final review by the Editor-in-Chief	(final quality		
Publication	control for academic content and language quality)→Final acceptance	e and charging		
process	of publication fee $\rightarrow$ Language editing $\rightarrow$ Production $\rightarrow$ Proofreading by scientific			
	editor→Proofreading by deputy editor→Final review by Editor-in-Chief→Release
