SPECIFIC COMMENTS TO AUTHORS

A case report of unusual case. IMF is also seen in the Gall bladder also and usually present in young female and locally adhered to surrounding structures like antrum and pylorus of the stomach. Good case report of unusual case and most of the time it is histological diagnosis seen in young patients with normal survival.

SPECIFIC COMMENTS TO AUTHORS

This case report is of great practical value, clinically rare, and can broaden clinical ideas for gastrointestinal endoscopists. The case provides detailed information on the impact and suggests additional gastroscopic images and solid tumours after surgery.
