SPECIFIC COMMENTS TO AUTHORS

The prevention and control of anemia in children is import. Analyzing regional data on childhood anemia and implementing effective targeted intervention measures are urgently needed. In this study, the authors investigate and analyze the current status and influencing factors of anemia among infants and young children aged 6 to 36 months in Ma'anshan, a city from China. This study provides reference materials for reducing the incidence of anemia and improving the health level of children in this age group in the region and has significant guiding implications. Overall, this study is well designed. After a minor revision, it can be accepted for publication. Comments: 1. The manuscript requires a minor editing. Some minor language polishing should be revised. 2. Tables should be double checked and moved to the end of the manuscript. 3. A short background should be added to the abstract. 4. Please describe the conclusion in the main text. 5. The references should be edited. PMID numbers and Doi numbers should be added.
