Peer-reviewer statements	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous
	Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

SPECIFIC COMMENTS TO AUTHORS

The authors administered steroids and 5-ASA preparations to cases of postoperative congestive ischemic colitis where conservative treatment had been insufficient and presented cases in which these treatments were effective. Although it is unclear which is the most effective - steroids alone, 5-ASA alone, or the combination of steroids and 5-ASA - it is believed to be significant to present cases where anti-inflammatory drugs were effective as a treatment option to be considered before resorting to surgical treatment for congestive ischemic colitis.
