JOURNAL EDITORIAL BOARD COMMENTS TO AUTHORS

In this manuscript, the authors summarized the studies regarding COVID-19. They concluded that those studies have reported a decline in vaccination rates among the pediatric population because of the coronavirus disease 2019 pandemic. The disruption in vaccine coverage has resulted in a negative impact on the health of children, with some races, ethnicities, age groups, areas of settlement, and parts of the world affected more than others. Government efforts should be directed towards reversing these missed vaccinations. Overall, the manuscript is well prepared. Meanwhile, the reviewer comments have also been responded properly.
