Scientific significance of the conclusion in this manuscript	[Y] Grade A: Excellent [] Grade B: Good [] Grade C: Fair [] Grade D: No scientific significance
Language quality	[Y] Grade A: Priority publishing [] Grade B: Minor language polishing [] Grade C: A great deal of language polishing [] Grade D: Rejection
Conclusion	[] Accept (High priority) [] Accept (General priority) [Y] Minor revision [] Major revision [] Rejection
Re-review	[Y]Yes []No
Peer-reviewer statements	Peer-Review: [] Anonymous [Y] Onymous Conflicts-of-Interest: [] Yes [Y] No

SPECIFIC COMMENTS TO AUTHORS

During the COVID-19 pandemic, this is a valuable case that offers guidance, alerting readers to the possibility of pulmonary embolism in young suspected pneumonia patients, especially when unexplained hypoxemia occurs. There are only a few issues with this manuscript: 1. It is recommended to supplement an image of the electrocardiogram. 2. Were antithrombin X levels checked? Was there testing for thrombophilia?
