

18<sup>th</sup> October 2023

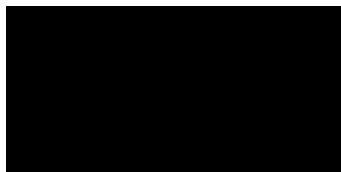

Dear Editor,

I Mr. Alexander Green, Research Fellow and Trainee Surgeon, state that the presented article entitled:

“Comparison of Clinical Outcomes between  
Total Hip Replacement and Total Knee Replacement”.

was strictly an observational study that did not assign patients to any interventions. This was an observational study using existing data from routine clinical care. Therefore, IRB approval was not required.

Yours Sincerely,

Mr Alexander Green MBBS, MRCS, MRes, PGCME  
Core Surgical Trainee  
Department of Trauma and Orthopaedic Surgery  
South Tyneside District Hospital  
United Kingdom
