	Editorial Office's Comments	
	Science Editor: We are very pleased to receive your revised	
	manuscript (No. 89541). However, there are some questions that	
	need to be addressed. 1. Please provide the biostatistics statement	
	(see the sample in the attachment). 2. We need to confirm whether	
	the figure is original. If an author of a submission is re-using a	
	figure or figures published elsewhere, or that is copyrighted, the	
2	author must provide documentation that the previous publisher or	F24 - 1
	copyright holder has given permission for the figure to be	[Y ]
	re-published. Please provide the permission certificate. Otherwise,	
	we will withdraw the paper or delete this figure. Citation: Yang JM,

Inc[6]". 3. Please download and complete the PRISMA 2009 Checklist (add page) to ensure that the manuscript meets the requirements of the PRISMA 2009 Checklist. Authors must state on the title page of the manuscript that the PRISMA 2009 Checklist have been adopted. Please provide the PDF version of the completed PRISMA 2009 Checklist to the system. Please reply within seven days, thank you! Only one file is available in F6publishing system, please upload all files with zip format, or send to me by email (y.l.chen@wjgnet.com).

Company Editor-in-Chief: I have reviewed the Peer-Review Report, full text of the manuscript, all of which have met the basic publishing requirements of the World Journal of Gastroenterology, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. When revising the manuscript, it is recommended that the author supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply PubMed, or a new tool, the RCA, of which data source is PubMed. RCA is a unique artificial intelligence system for citation index evaluation of medical science and life science literature. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can

then be used to further improve an article under preparation/peer-review/revision. Please visit our RCA database for more information at: https://www.referencecitationanalysis.com/, or visit PubMed at: https://pubmed.ncbi.nlm.nih.gov/.  3 The fixed headings are copied. [Y]  The title concisely summarizes the main topic of the study and is not too long (no more than 18 words). Words such as 'exploration', 'research', 'analysis', 'observation', and 'investigation' are avoided. The title does not start with 'The' and does not include any Arabic numbers or uncommon abbreviations.  5 A short running title is provided (no more than 6 words). [Y]  The authors' full family (sur)names and full/abbreviated first names are listed on the title page and are consistent with those listed in the signed BPG Copyright License Agreement form.  The 'Author contributions' passage describes the specific contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names.  e.g., "Wang CL and Liang L contributed equally to this work; Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed			T

The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title (e.g., MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.  The Manuscript Tracking information (i.e., Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.  The Abstract section is formatted according to the article-specific style (structured vs unstructured) and word count thresholds, as follows:  Commentary, Frontier, Diagnostic Advances, Medical Ethics, Minireview, Review, Therapeutics Advances, and Topic Highlight: Non-structured abstract that is no less than 200 words.  Field of Vision, Case Report and Letter to the Editor: Non-structured abstract that is no less than 150 words.  Research articles: Structured abstract with subsections for AIM (no more than 20 words); MFTHODS (no less than 80 words); RESULTS (no less than 120 words); and CONCLUSION (no more than 26 words).  The 'Key words' list provides 5-10 keywords that reflect the main content of the study. The first letter of each keyword is capitalized, and each keyword is separated by a semicolon.  The "citation" contains authors' names and manuscript title. The name of the first author should be typed with the first letter capitalized, followed by their abbreviated first and middle initials. For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick Fom, Daniel Durrance, Sang Min Park will be written as Yoon JM,			
PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors. 	Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
	mellitus increases the risk of gastric cancer: A meta-analysis. World J	
	Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the	
14	study that outlines the most innovative and important arguments	[] ]
	and core contents of the paper and will serve to effectively attract	[Y ]
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
	with the full name of abbreviations given upon first appearance in	
15	the text and the abbreviation presented in parentheses [i.e.,	[Y ]
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	
	describes all materials and methods used to obtain the data	
16	presented in the article and is adequate for a reader to repeat the	[N ]
	study.	
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
17	the text, a table or figure (i.e., chart, diagram, graph or image), but is	[N ]
1,	not repeated among each. Information presented in the tables and	
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.	

**Telephone:** +1-925-399-1568 **E-mail:** office@baishideng.com

	Statistical symbols are accurate. Statistical significance is expressed	
18	as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted).	
	If there are other series of $P$ values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	[N ]
	and a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.	
	Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.	
	The 'DISCUSSION' section (1) describes the main purpose and	
	hypothesis of the study; (2) summarizes the most important results;	
	(3) illustrates and explains the results (but does not simply repeat	
40	the data) and draws conclusions or inferences based on the results;	
19	(4) points out the limitations of the study and their impact on the	[N ]
	results, as well as proposes further advice on future research	
	topic(s) or direction(s); and (5) describes the theoretical significance	
	and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
	individuals or organizations for technical support (i.e., providing	
21	instrumentation, equipment or experimental materials, and/or	
	assistance in experimental work), non-technical services (i.e., useful	[N ]
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
	The 'ARTICLE HIGHLIGHTS' section provides comments for	f > 7 - 1
	original articles in accordance with the specified format.	[N ]
	The 'REFERENCES' section lists the references in the Vancouver	
	style. This style uses Arabic numeral in-text citations based on the	
	order of the first appearance of a source in the text. For citations	
	where the author's name is indicated in the text, a superscript	
	number should be placed following the name (i.e, "Pang et al"). For	[Y ]
	citations where no author is indicated, a superscript number should	
	be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup>	
	reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a high	
	sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the	

**Telephone:** +1-925-399-1568 **E-mail:** office@baishideng.com

	reference number is described in the text; for example, "The	
	experimental method used has been described in reference [8]." The	
	style of reference citations in tables is the same as that in the text	
	(e.g., Pan et al <sup>[2-5]</sup> , please see reference [8]).	
	Journal references have been verified to ensure that there are no	
	duplicate references and that the PMID numbers are correct. For	
	references not yet included in PubMed: the name of Chinese	
22	journals is spelled out using Chinese Pinyin, with the first letter of	F3/ 1
23	each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of	[Y ]
	journals in other languages are listed according to indexing	
	information retrieved from Google. Book references are presented	
	with all the information relevant to the electronic version.	
	The number of cited references is appropriate for the article type, as	
	follows:	
24	Commentary: no less than 50;	[Y ]
24	Review: no less than 100;	
	Article: no less than 30/26;	
	Case Report and Letter to the Editor: no less than 1.	
	The ethics-related statements are provided in accordance with the	
	manuscript type (e.g., Manuscript NoInstitutional review board	[Y ]
	statement, Manuscript NoAnimal care and use statement, etc.).	
	The names of the peer reviewers and the scientific editor are present	
26	at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang	[Y ]
	JL).	
27	The order and numerical labeling of tables and figures is consistent	
	with their appearance and presentation in the text. Symbols in	
	tables (e.g., +, -, $\times$ , $\div$ , *) correctly correspond to the definitions in the	[Y ]
	footnotes. Only one legend is provided for each multi-panel figure	
	consisting of color graphs, black and white graphs, or line graphs	
	that depicts data of the same theme. For example: Figure 1

Responsibilities
of scientific
editors

The primary responsibilities of our scientific editors include carefully checking the entire manuscript and all accompanying materials for: (1) errors in spelling, grammar, punctuation and wording; (2) suitability of tables, figures, figure data and legends; (3) accurate and appropriate presentation of symbols (e.g. +, -, ×, ÷, %, \*) in tables and figures; and (4) complete and comprehensive revision of the manuscript according to the reviewers' comments.

# Publication process

Manuscript reception and registration→Initial review by scientific editor→Peer review→End of peer review→First round of meeting evaluation→To be accepted→Revision by the author(s)→Second round of meeting evaluation→To be accepted/revised/rejected→Final review by the Editor-in-Chief (final quality control for academic content and language quality)→Final acceptance and charging of publication fee-Language editing-Production-Proofreading by scientific editor→Proofreading by deputy editor→Final review by Editor-in-Chief→Release of online open-access papers in electronic form on the BPG website-Release of online papers on PubMed Central→Delivery of high-quality PDF reprints to the author(s)→End of the publication process.

Notes

# <sup>1</sup>Ethics and Relevant Document Handling Time

For the checking of the ethics and relevant document, the editing fee should be calculated independently to the Scientific Editor. The handling time of the ethics and relevant documents for clinical and basic researches is calculated as 3 hours, for case reports and other types of manuscript is calculated as 2 hours.

If any errors are found in ethics and relevant document after a manuscript is published, a fine of 500 CNY will be imposed on the Scientific Editor for the manuscript, which will be deducted from the Scientific Editor's Welfare provided by the Baishideng Publishing Group.
