Dear editor:

We do appreciate you for your consideration and review of our manuscript (*Manuscript NO.: 90049, Systematic Reviews, Quality of life after pancreatic surgery*). We are also grateful for constructive remarks and suggestions on our manuscript from you and the reviewer. We have carefully revised the manuscript by incorporating all the suggestions by the review panel. Each suggested revision and comment, brought forward by all of you was accurately incorporated and considered. **We rewrote our background to added content, added the latest cutting-edge research results into our manuscripts, and checked our manuscripts word-for-word.** Details revision was shown as follows. The changes to our manuscript within the document were also highlighted with yellow color.

We sincerely hope this revised manuscript has addressed your concerns and this manuscript will be accepted to be published on *World Journal of Gastroenterology*.

We would like to appreciate you again for your kind consideration of our work and look forward to hearing from you soon.

Best regards

Sincerely

Prof. Renyi Qin, MD, FACS

Vice-Chairman of the China Abdominal Tumors Association of Medicine Education;

Vice-Director of the Minimally Invasive Group of Pancreatic Cancer Committee of

Chinese Anti-Cancer Association;

Group Leader of the Chinese Pancreas Disease of the Minimally Invasive Treatment Group;

Committee Member of the Pancreatic Disease Branch of China International

Exchange

and Promotive Association for Medical and Health Care;

Director of General Supervision of Operation, Affiliated Tongji Hospital, Tongji Medical College, Huazhong University of Science and Technology. 2012- Present;

Director of the Department of Biliary-Pancreatic Surgery, Affiliated Tongji Hospital, Tongji Medical College, Huazhong University of Science and Technology.

Point-by-point Response.

Reviewer

1. *Kindly rewrite the Background as it is very short. Kindly mention physiological role of pancreas, complexity of the pancreatic surgery and thus higher chances of alteration in the general quality of life in these patients.*

1. Reply: We appreciate it very much for this good suggestion, and we have done it according to your ideas. We rewrote our background to add physiological role of pancreas (page 4, line 23), complexity of the pancreatic surgery (page 5, line 4) and higher chances of alteration quality of life (page 4, line 13). Your suggestions rounded out our manuscript.

2. *There are minor spelling mistakes and typos at one or two places.*

2. Reply: We are very sorry for our careless mistakes and we have gone over our manuscript many times to correct spelling errors and grammatical errors. You can find them in many places in our manuscript, such as on page 5, line 16 and so on.

3. *Overall a very relevant and well written article. Well done!*

3. We do appreciate the positive comments from you.

Science editor

1. *Please provide the Figures cited in the original manuscript in the form of PPT. All text can be edited, including A, B, arrows, etc. With respect to the reference to the Figure, please verify if it is an original image created for the manuscript, if not, please provide the source of the picture and the proof that the Figure has been authorized by the previous publisher or copyright owner to allow it to be redistributed. All legends are incorrectly formatted and require a general title and explanation for each figure. Such as Figure 1 title. A: ; B: ; C: .*

1. Reply: We do appreciate for your comments. We uploaded our figure according to your request and explain the source of our figure in the PPT. We have rectified the legends of our figure and tables.

2. *Please obtain permission for the use of picture(s). If an author of a submission is re-using a figure or figures published elsewhere, or that is copyrighted, the author must provide documentation that the previous publisher or copyright holder has given permission for the figure to be re-published, and correctly indicate the reference source and copyrights. For example, "Figure 1 Histopathological examination by hematoxylin-eosin staining (200 ×). A: Control group; B: Model group; C: Pioglitazone hydrochloride group; D: Chinese herbal medicine group. Citation: Yang JM, Sun Y, Wang M, Zhang XL, Zhang SJ, Gao YS, Chen L, Wu MY, Zhou L, Zhou YM, Wang Y, Zheng FJ, Li YH. Regulatory effect of a Chinese herbal medicine formula on non-alcoholic fatty liver disease. World J Gastroenterol 2019; 25(34):*

5105-5119. Copyright ©The Author(s) 2019. Published by Baishideng Publishing Group Inc[6]”. And please cite the reference source in the references list. If the author fails to properly cite the published or copyrighted picture(s) or table(s) as described above, he/she will be subject to withdrawal of the article from BPG publications and may even be held liable.

2. Reply: Our figure is original image created for our manuscript. We explained the situation in the PPT uploaded in the system, and added our

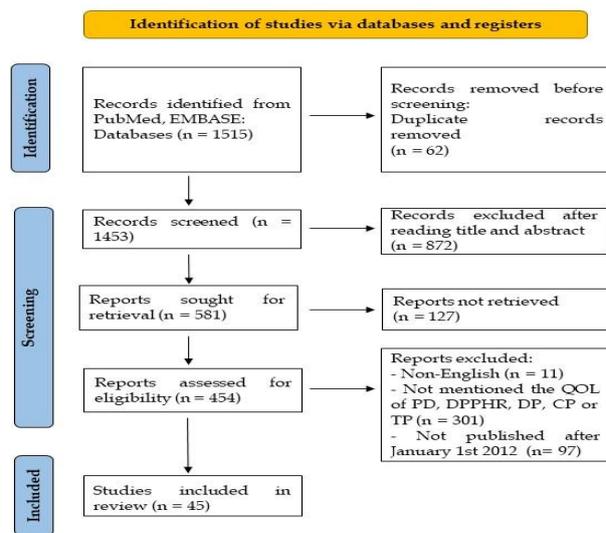

Figure 1 PRISMA flow diagram. QOL: Quality of life; PD: Pancreaticoduodenectomy; DPPHR: Duodenum-preserving pancreatic head resection; DP: Distal pancreatectomy; CP: Central pancreatectomy; TP: Total pancreatectomy.

The image content is the original image produced for the manuscript. The source of the image frame is from: Page MJ, McKenzie JE, Bossuyt PM, Boutron I, Hoffmann TC, Mulrow CD, et al. 3. Please don't include any *, #, †, §, ‡, ¥, @....in your manuscript; Please use superscript numbers for illustration; and for statistical significance, please use superscript letters. Statistical significance is expressed as $aP < 0.05$, $bP < 0.01$ ($P > 0.05$ usually does not need to be denoted). If there are other series of P values, $cP < 0.05$ and $dP < 0.01$ are used, and a third series of P values is expressed as $eP < 0.05$ and $fP < 0.01$.

3. Reply: We double-checked without any *, #, †, §, ‡, ¥, @.... Included in our manuscript.

4. *Please provide all fund documents.*

4. Reply: We uploaded the documents of our fund on the system.

5. *Recommendation: Conditional acceptance.*

5. Reply: We do appreciate for your consideration and review of our manuscript. We have revised the manuscript carefully according to your request. We sincerely hope to have the opportunity to publish this manuscript on your journal.

Company editor-in-chief

1. *I have reviewed the Peer-Review Report, full text of the manuscript, all of which have met the basic publishing requirements of the World Journal of Gastroenterology, and the manuscript is conditionally accepted.*

1. Reply: We do appreciate you for your positive comments and for giving us the opportunity to revise the article.

1. *When revising the manuscript, it is recommended that the author supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply PubMed, or a new tool, the RCA, of which data source is PubMed. RCA is a unique artificial intelligence system for citation index evaluation of medical science and life science literature. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can then be used to further improve an article under preparation/peer-review/revision. Please visit our RCA database for more information at: <https://www.referencecitationanalysis.com/>, or visit PubMed at: <https://pubmed.ncbi.nlm.nih.gov/>.*

1. Reply: We appreciate it very much for this good suggestion, and we have done it according to your ideas. We added the latest cutting-edge research results into our manuscripts (page 7, line 25; page 10, line 27). Your suggestion made our manuscripts more comprehensive and representative.
