SPECIFIC COMMENTS TO AUTHORS

This is a well-written editorial that comment on a recent article by Manan MR et al. published in the World Journal of Cardiology entitled “Acute myocardial infarction in myeloproliferative neoplasms”. However, it also needs to undergo a few minor changes. Acute myocardial infarction is one of the leading causes of death in the developed world. The relationship between acute myocardial infarction and myeloproliferative neoplasms has been revealed in the past few years. Therefore, the causal link between the two needs to be further clarified. This manuscript seems merely a brief introduction to myeloproliferative neoplasms. Likewise, Figure of this manuscript is suggested being redrawn to stick to the topic of this paper.
