## SPECIFIC COMMENTS TO AUTHORS

1. There was no tumor marker detection in the entire diagnosis and treatment process of the patient, so why did the author not use tumor markers for detection? 2. Is the patient's lung a single lesion? Why is it not resected? 3. Did the patient undergo PET/CT examination after radiotherapy? How to confirm hyoid lesion clearance? 4. Why not combine radiotherapy with chemotherapy? 5. How long was the patient followed up? What is the survival period? Did symptoms recur after treatment? 6. No specific value was given for the blood test indicators in this case
