

## Format for ANSWERING REVIEWERS

February 25, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 9042-review.doc).

**Title:** Magnetic Resonance Cholangiography in the assessment and management of biliary complications after OLT

**Author:** Rossano Girometti, Lorenzo Cereser, Massimo Bazzocchi, Chiara Zuiani

**Name of Journal:** *World Journal of Radiology*

**ESPS Manuscript NO:** 9042

The manuscript has been improved according to the suggestions of reviewers:

- 1 Format has been updated according to the journal specifications
- 2 Revision has been made according to the suggestions of the reviewers.

(1) Since all the reviewers (02860745, 02505244 and 02830340) suggested minor language polishing, we asked two English-mother language colleagues having the fellowship in our Institution to refine the text (names have been included in the acknowledgments at the end of the article). All changes incorporated in the re-submitted manuscript are colored in red. Such changes are just limited to grammar and syntax, with no substantial modification of the content compared to the original version of the manuscript. We believe that English language is suitable for publication after this review.

(2) We corrected all the minor points listed by the reviewer 02830340 in order to improve the text. On the other hand, we didn't follow the suggestion to eliminate Fig. 10b, since this image is indispensable to show how the sphincter of Oddi fails to relax compared to Fig. 10a, i.e. during cinematic MRC, which includes repeated scan of the same MRC slice. We believe that showing both images can help the reader to understand how cinematic MRC is performed. In order to emphasize the above concepts, we slightly changed the Fig. 10 legend accordingly.

3 References and typesetting were corrected according to the suggestions of the reviewer 02830340 (in particular, references # 8, 26, 33 and 51).

We particularly thank reviewers 02030340 and 02860745 for the valuable suggestions. We hope to have improved the paper following them.

Thank you again for considering our manuscript for the publication on the *World Journal of Radiology*.

Sincerely yours,

Rossano GIROMETTI, MD
