## SPECIFIC COMMENTS TO AUTHORS

Thank you very much for the opportunity to review this manuscript. The topic is very interesting and the content is well organized. I have just a few comments; The abbreviation should be mentioned first before use in the second time. If that word used only one time, there is no need to use the abbreviation for example - ALD should be replaced with alcoholic liver disease (part- core tip) and MASLD should be in full word first (part-introduction). Additionally, it will be very good if the authors could provide the algorithm summarize the strategies to manage cirrhosis. Screening test should be mentioned in more details such as biomarker or USG and the frequency of these investigations. Thank you and congratulation for the manuscript.
