Conclusion: Accept (General priority)

Specific Comments to Authors:

This is a manuscript about how to manage pain in chronic pancreatitis. I Suggest drawing a graph in the summary section to more vividly illustrate the intervention methods and mechanisms of various types of pain.

Author's Response:

The authors are extremely thankful to the reviewer for sparing the time and effort to review our manuscript. As suggested "a graph in the summary section to more vividly illustrate the intervention methods and mechanisms of various types of pain" has been added. Figure 1: Mechanism of pain in Chronic Pancreatitis and Figure 2: Intervention methods in Chronic Pancreatitis has been incorporated.

Authors are requested to send their revised manuscript to a professional English language editing company or a native English-speaking expert to polish the manuscript further. When the authors submit the subsequent polished manuscript to us, they must provide a new language certificate along with the manuscript.

Author's Response:

As suggested language editing has been done by Enago. English language editing has been done by one of the suggested companies. Certificate is attached. Their modified manuscript is also attached for review.
