Company Editor-in-Chief: I have reviewed the Peer-Review	v
Report, full text of the manuscript, all of which have met the basi	с
publishing requirements of the World Journal of Gastroenterology	<i>,</i> ,
and the manuscript is conditionally accepted. I have sent th	e
manuscript to the author(s) for its revision according to th	e
Peer-Review Report, Editorial Office's comments and the Criteri	a
for Manuscript Revision by Authors. When revising the manuscrip	t,
it is recommended that the author supplement and improve th	e
highlights of the latest cutting-edge research results, thereby furthe	r
improving the content of the manuscript. To this end, authors ar	e
advised to apply PubMed, or a new tool, the Reference Citation	n
Analysis (RCA), of which data source is PubMed. RCA is a uniqu	e
artificial intelligence system for citation index evaluation of medica	1
science and life science literature. In it, upon obtaining search	h
results from the keywords entered by the author, "Impact Index Pe	r
Article" under "Ranked by" should be selected to find the lates	it
highlight articles, which can then be used to further improve a	n
article under preparation/peer-review/revision. Please visit ou	r
RCA database for more information a	t:
https://www.referencecitationanalysis.com/, or visit PubMed a	t:
https://pubmed.ncbi.nlm.nih.gov/.	
3 The fixed headings are copied.	[Y]
4 The title will concisely summarize the main topic of the study	
	I

	being not overly long (no more than 18 words). Words such as	
	'exploration', 'research', 'analysis', 'observation', and 'investigation'	
	are to be avoided. The title should not start with 'A', 'An', or 'The'	
	and will not include any Arabic numbers or abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]
	The authors' full family (sur)names and full/abbreviated first	
6	names are listed on the title page and are consistent with those	[Y]
	listed in the signed Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	[Y]
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	the research; Xue JZ and Lu JR contributed new reagents and	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
	Wang CL, Liang L and Fu JF wrote the manuscript. All authors	
	have read and approve the final manuscript."	
	The 'Supported by' statement describes the source(s) of financial	
8	support and includes the corresponding identification number(s)	[Y]
	and program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address	[Y ]
	(including zip code) and e-mail (written in all lowercase), and	
	contains no spelling errors.	
	The Manuscript Tracking information ( <i>i.e.</i> , Received, Peer review	
10	started, First decision, Revised, Accepted, Article in press, and	[Y]
	Published online) are provided along with the corresponding editor	

	and date for each item, and contain no spelling errors.	
	The Abstract section is formatted according to the article-specific	
	style (structured <i>vs</i> unstructured) and word count thresholds, as	
	follows:	
	Editorial, Frontier, Medical Ethics, Minireview, Review:	
	Non-structured abstract that is no more than 200 words.	
	Field of Vision, and Letter to the Editor: Non-structured abstract	
	that is no more than 150 words.	
11	Research articles: Structured abstract with subsections for	[Y]
	BACKGROUND (no more than 100 words); AIM (no more than 20	
	words); METHODS (no more than 80 words); RESULTS (no more	
	than 120 words); and CONCLUSION (no more than 26 words).	
	Case Reports: Structured abstract with subsections for	
	BACKGROUND (no more than 80 words); CASE SUMMARY (no	
	more than 150 words); and CONCLUSION (no more than 20	
	words).	
	The 'Key words list' will provide 5-10 keywords that reflect the	
	main content of the study. Please do not use abbreviations for the	
12	keywords ( <i>e.g.</i> ulcerative colitis, not UC). The first letter of each	[Y]
12		
	keyword will be capitalized, and each keyword will be separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The	
	name of the first author should be typed in bold letters; the family	
10	(sur) name of all authors should be typed with the first letter	
13	capitalized, followed by their abbreviated first and middle initials.	[Y]
	For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	
	Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,	
	Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	

	mellitus increases the risk of gastric cancer: A meta-analysis. World J	
	<i>Gastroenterol</i> 2024; In press	
	The Core tip is a short paragraph that is independent of the content	
14	of the Abstract. The 'Core tip' will provide a summary of the study	
14	that outlines the most innovative and important arguments. This	[Y]
	section should be less than 100 words.	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
	with the full name of abbreviations given upon first appearance in	
15	the text and the abbreviation presented in parentheses [i.e.,	[Y]
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	
	describes all materials and methods used to obtain the data	
16	presented in the article and is adequate for a reader to repeat the	[Y]
	study.	
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
17	the text, a table or figure ( <i>i.e.</i> , chart, diagram, graph or image), but is	[Y]
	not repeated among each. Information presented in the tables and	
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.	
18	Statistical symbols are accurate. Statistical significance is expressed	[Y]
		I

	1	
	as ${}^{a}P < 0.05$ , ${}^{b}P < 0.01$ ( $P > 0.05$ usually does not need to be denoted).	
	If there are other series of <i>P</i> values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	
	and a third series of <i>P</i> values is expressed as ${}^{e}P < 0.05$ and ${}^{f}P < 0.01$ .	
	Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.	
	The 'DISCUSSION' section (1) describes the main purpose and	
	hypothesis of the study; (2) summarizes the most important results;	
	(3) illustrates and explains the results (but does not simply repeat	
10	the data) and draws conclusions or inferences based on the results;	
19	(4) points out the limitations of the study and their impact on the	[Y]
	results, as well as proposes further advice on future research	
	topic(s) or direction(s); and (5) describes the theoretical significance	
	and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
	individuals or organizations for technical support ( <i>i.e.</i> , providing	[N ]
	instrumentation, equipment or experimental materials, and/or	
20	assistance in experimental work), non-technical services ( <i>i.e.</i> , useful	
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
	The 'REFERENCES' section lists the references in the Vancouver	
	style. This style uses Arabic numeral in-text citations based on the	
	order of the first appearance of a source in the text. For citations	
	where the author's name is indicated in the text, a superscript	
	number should be placed following the name ( <i>i.e.</i> , "Pang <i>et al</i> "). For	
	citations where no author is indicated, a superscript number should	
22	be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup>	[Y]
	reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a high	
	sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the	
	reference number is described in the text; for example, "The	
	experimental method used has been described in reference [8]." The	
	style of reference citations in tables is the same as that in the text	

References have been edited by Auto-Analyser. Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version.[Y]24Commentary: no less than 50; Review: no less than 100; Article; no less than 30/26; Case Report and Letter to the Editor; no less than 1.[Y]25The ethics-related statements are provided in accordance with the manuscript type (e.g., Manuscript No-Institutional review board statement, Manuscript No-Animal care and use statement, etc.).[Y]26The names of the pear reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL L-Editor: P-Editor).[Y]27The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, ×, +, +) correctly correspond to the definitions in the footnotes.
