CERTIFICATE OF EDITING

This Certificate of Editing is issued to confirm that the manuscript titled “Radiologic-pathologic correlation of three-dimensional shear-wave elastographic findings after radiofrequency ablation” written by Katsutoshi Sugimoto, MD, et al. has been reviewed by a native English-speaking medical editor in the Documentation Section of Toshiba Medical Systems Engineering (TME). The manuscript has been edited for proper English and medical terminology in order to satisfy the language requirements for publication in English-language professional journals.

The research contents and the authors’ intended meaning have not been altered. TME certifies the quality of the English language in this edited manuscript, but is not responsible for any further revisions or additions that may be made by others before submission.
