
Assignment number: EDUREW-1

Filename: 9741-edited_EDUREW-1.doc

¹ Please post your clarifications or questions through the “After Sales” section at <https://my.enago.com/en/login.htm>.

Dear Author:

Thank you for entrusting us with your manuscript and opting for our Proofreading service. We have proofread your assignment EDUREW-1 and would like to share our experience. The document required moderate changes with regard to grammar and punctuation. Overall, your manuscript needed moderate intervention to meet proofreading standards.

Further, we have checked the formatting of your manuscript thoroughly against the guidelines. Considerable formatting changes were required for adherence to the guidelines. Please address the notes given in the “Journal Formatting” section for complete adherence.

Please be assured that we have edited the manuscript to the best of our ability and have clarified some of our changes through tags and remarks. As a step toward finalization, we suggest that you resolve all tags in the main file and remarks given in the following sections, as this is important for successful publication.

We have added tips on academic writing conventions specific to your manuscript in the edited file. We hope you find these tips helpful for future writing. We wish you the very best for the successful publication of your manuscript and look forward to working with you again.

Sincerely,

Your Editor

¹Editor Message is a means of personal communication between the author and the editor through which the editor clarifies manuscript-related points, provides suggestions/improvements, and/or notifies the author about the next steps.

*For Editor Name disclaimer please see our [Terms and Conditions](#)

Meaning, Content, Language, or Style

[Remark 1] - Please note that the highlighted key word is too generic for indexing purpose. Please consider providing other appropriate key words and revise as applicable.

Journal Formatting

- As per the *World Journal of Gastroenterology* guidelines, the complete name and number of supportive foundations should be provided on the Title page, e.g., Supported by National Natural Science Foundation of China, No. 30224801. Please check and revise as applicable.
- For articles of these sections, original articles, rapid communication and case reports, the main text should be structured into the following sections: INTRODUCTION, MATERIALS AND METHODS, RESULTS and DISCUSSION, and should include appropriate Figures and Tables. Data should be presented in the main text or in Figures and Tables, but not in both. Please check and revise as applicable.
- **Acknowledgments:** Brief acknowledgments of persons who have made genuine contributions to the manuscript and who endorse the data and conclusions should be included. Authors are responsible for obtaining written permission to use any copyrighted text and/or illustrations.
- **Illustrations:** Figures should be either Photoshop or Illustrator files (in tiff, eps, jpeg formats) at high-resolution. Examples can be found at: <http://www.wjgnet.com/1007-9327/13/4520.pdf>; <http://www.wjgnet.com/1007-9327/13/4554.pdf>; <http://www.wjgnet.com/1007-9327/13/4891.pdf>; <http://www.wjgnet.com/1007-9327/13/4986.pdf>; <http://www.wjgnet.com/1007-9327/13/4498.pdf>. Keeping all elements compiled is necessary in line-art image. Scale bars should be used rather than magnification factors, with the length of the bar defined in the legend rather than on the bar itself. File names should identify the figure and panel. Avoid layering type directly over shaded or textured areas. Please use uniform legends for the same subjects. Please check and revise as applicable for journal compliance. Provide a brief title for each figure on a separate page. Detailed legends should not be provided under the figures. We have accordingly relocated the figure legends to the end of the manuscript. Please check.

-
- **Tables:** Three-line tables should be numbered 1, 2, 3, etc., and mentioned clearly in the main text. Provide a brief title for each table. Detailed legends should not be included under tables, but rather added into the text where applicable. The information should complement, but not duplicate the text. Use one horizontal line under the title, a second under column heads, and a third below the Table, above any footnotes. Vertical and italic lines should be omitted. Please check and revise as applicable.
 - **Notes in tables and illustrations:** Data that are not statistically significant should not be noted. ^a $P < 0.05$, ^b $P < 0.01$ should be noted ($P > 0.05$ should not be noted). If there are other series of P values, ^c $P < 0.05$ and ^d $P < 0.01$ are used. A third series of P values can be expressed as ^e $P < 0.05$ and ^f $P < 0.01$. Other notes in tables or under illustrations should be expressed as 1F, 2F, 3F; or sometimes as other symbols with a superscript (Arabic numerals) in the upper left corner. In a multi-curve illustration, each curve should be labeled with ●, ○, ■, □, ▲, △, etc., in a certain sequence. Please check and revise if applicable.

Notes

- Please ensure that you address the reviewer comments provided in yellow highlights in the manuscript prior to submission.
- Please note that we have used green color to highlight the Remark inserted in the main text as the original manuscript has text highlighted in yellow.

Share your experience with us—we value your feedback!

Please share your experience of using our editing service by completing our short survey form available in the “Feedback” section from “ASN view” at <https://my.enago.com/en/login.htm>.

Your feedback will enable us to better understand your current and future editing requirements, and help us in exceeding your expectations. Your participation in this survey is greatly appreciated. Thank you for your support in advance.

Publication Ethics: Acknowledging Manuscript Preparation Help

In order to guide our clients toward following strong ethical practices, we have decided to adopt guidelines published by the Committee on Publication Ethics (<http://publicationethics.org/about>), which are followed by several major publishers of journals encompassing all academic fields. The guidelines suggest that “All contributors who do not meet the criteria for authorship should be listed in an acknowledgments section.”

If you agree that our editors have made significant contribution to your manuscript, we request you to acknowledge the contribution by including the following sentence in the acknowledgement section of your manuscript.

The authors would like to thank Enago (www.enago.com) for the English language review.
