

May 29, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 10238-review.doc).

Title: Effects of Physical activity in Parkinson's Disease: a new tool for rehabilitation

Author: Paolo Borrione, Eliana Tranchita, Pierpaolo Sansone, Attilio Parisi

Name of Journal: *World Journal of Methodology*

ESPS Manuscript NO: 10238

First of all I would like to thank you for the comments on the manuscript. Reviewer's advices surely improved its quality.

The manuscript has been extensively revised and improved according to the suggestions of the reviewers as follows (all modifications are highlighted in red in the text):

1. The manuscript underwent a complete grammar revision performed by a native English speaker.
2.
 - a) Details on physical activity programs have been added;
 - b) Neuro-chemical changes induced by physical activity have been illustrated;
 - c) Crucial modifications induced by physical activity have been described;
 - d) Progresses in quality of life achieved practicing physical activity have been discussed;

Thank you again for publishing our manuscript in the *World Journal of Methodology*.

Should you have any further communication, please do not hesitate to contact me as the corresponding author

Sincerely yours,
Paolo Borrione
