

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 86680

Title: Bilateral dislocation of the long head of biceps tendon with intact rotator cuff tendon: A case report

Provenance and peer review: Unsolicited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 02445816

Position: Editorial Board

Academic degree: BSc, MSc, PhD

Professional title: Assistant Professor, Physiotherapist

Reviewer's Country/Territory: Greece

Author's Country/Territory: South Africa

Manuscript submission date: 2023-07-05

Reviewer chosen by: AI Technique

Reviewer accepted review: 2023-07-12 07:14

Reviewer performed review: 2023-07-12 08:06

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

The paper is well-written, describing clearly and succinctly the anatomy of the area and surgical procedures followed to reduce the bilateral biceps dislocation in this rather unusual case, following the CARE 2016 Statement instructions. The video and photographic material accompanying the manuscript are particularly important in the understanding of the diagnosis of this condition. However, I would prefer authors to include one more photo (either from the patient or of a graphic representation) of the location of the tenodesis performed. The follow up times indicated are adequate.

SPECIFIC COMMENTS TO AUTHORS

well-written and described with good outcomes Long head of biceps dislocation fairly common incidence, bilateral rare kindly provide details of the subscapularis tendon intra op also provide details regarding the biceps pulley also provide the classification Walch , Bennet types Please state the Lafosse type as well Regarding the MRI Please add information regarding Chondral print , LHB angle, LHB groove distance -especially as this is bilateral - will add more value pls add the ref. Long head biceps tendon instability: diagnostic performance of known and new MRI diagnostic signs. Zappia M, Ascione F, Di Pietto F, Fischetti M, Romano AM, Castagna A, Brunese L. Skeletal Radiol. 2021 Sep;50(9):1863-1871.
