

Dear Editor,

I have revised my manuscript (Manuscript NO.: 62653, Retrospective Study) according to the current reviewers' comments and resubmitted it.

1. The title needs to be revised. The current title will make readers ambiguous, thinking that the article is about Parkinson's disease patients and constipation patients.

I have revised the title to "Study on the characteristics of intestinal motility of constipation in patients with Parkinson's disease".

2. The description of the method part is too simplistic. The study only stated that all patients underwent colonic transit test (CTT) and high-resolution anorectal manometry (HRAM). This is too concise for a scientific research.

I've modified the research method.

3. The DISCUSSION could also be shortened and focused more.

I have shortened The DISCUSSION.

4. The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the

figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor.

I have provided original picture.

5. DOI numbers are missing in the reference list. Please provide the DOI citation numbers to the reference list and list all authors of the references. Please revise throughout.

I have revised the references as required.

6. The “Article Highlights” section is missing. Please add the “Article Highlights” section at the end of the main text.

I have added the “Article Highlights” section.

7. Authors should always cite references that are relevant to their study. Please check and remove any references that not relevant to this study.

I have removed references that not relevant to this study.

Thank you very much

Best regards

Mei Zhang
