Language certificate for:-

Manuscript 15299 entitled “Role of *Helicobacter pylori* infection in pathogenesis of atherosclerosis.”

Dear Sir,

The manuscript is again being reviewed for grammatical mistakes and necessary corrections have been done. I personally consider it as Grade A for publication.

I have published 9 papers in World J Cardiology under Baishideng Publishing Group Inc. In the past, I have not taken any help from any English language editing companies for these publications. I agree with your terms that if there will be any gross English mistake, the manuscript will be rejected.

I hope you will find it suitable for publication.

With kind regards,

Dr Rajesh Vijayvergiya,
