SPECIFIC COMMENTS TO AUTHORS

To Authors This manuscript is very interesting. The presentation of the clinical features (physical, laboratory imaging studies) is complete and correct such as the pathological characteristics. In the Case-Report should be added the postoperative evolution and the

possible use of the postoperative chemotherapy and its rational base and in case, this part can be more developed in the Discussion. Another soft observation: in the Abstract-Case Report should be clarified the sentence “the patient received splenectomy of pancreatic tail”: it’s not clear. In summary this Case-Report is well written with excellent figures and review of the literature, and is a very good work.

SPECIFIC COMMENTS TO AUTHORS

1. This is an interesting case report and well presented. 2. some IHC images will be useful for various markers analyzed. 3. The authors should discuss more why the case is unique and interesting. 4. Any data showing MDM2 protein expression in the tumors?
