SPECIFIC COMMENTS TO AUTHORS

I think that the Author rise important issues regarding the effect of Sars-CoV-2 infection on patients with haematologic malignancies, and that this letter could stimulate the debate on this matter.

SPECIFIC COMMENTS TO AUTHORS

This is a letter to the editor written by Dr. Özdemir Öner about the article: Riches JC. Impact of COVID-19 in patients with lymphoid malignancies. *World J Virol* 2021; 10(3): 97-110. In this letter, the author questions several terms used by Riches et al based on current literature. It's a rich discussion among the authors and I suggest responses by Riches et al.

SPECIFIC COMMENTS TO AUTHORS

Thank you very much for letting me contribute to the scientific achievements of the authors'. I understand the defects of the article by Riches JC and the points the authors addressed. Any kind of scientific articles have their own limitations and drawbacks. Now as clinicians, what we are expected to do is to reinforce the theory of the original investigations or point out the significant distortion. Here, the authors' claims were sensible. But I did not personally see the idea how to utilize these information in practical situation. On the other hand, the authors' comments are important because Review articles have the critical role to update the whole concept or management standard of the diseases. With this respect, adding these information is of great essence to provide readers with more accurate information.
