

Gastrointestinal Motility Problems in Patients with ...

<https://link.springer.com/article/10.2165/00002512-199710040-00002> ▾

Oct 17, 2012 · Gastrointestinal (GI) motility disorders are frequent in patients with Parkinson's disease, manifesting mainly as **dysphagia**, disorders of gastric emptying and constipation. The most likely causes of these disorders are cerebral degeneration and degeneration of the my enteric plexus.

Gastric emptying time and gastric motility in patients ...

<https://pubmed.ncbi.nlm.nih.gov/11748735>

Gastrointestinal symptoms such as nausea, abdominal pain, and bloating are frequent complaints of patients with Parkinson's disease (PD). It has been postulated that impaired gastrointestinal function may contribute to the development of motor fluctuations such as delay on and no on in patients with PD.

Constipation in Parkinson's Disease - ScienceDirect

https://www.sciencedirect.com/science/article/pii/S0074774217300971

Jan 01, 2017 · Astarloa, Mena, Sanchez, de la Vega, and de Yébenes (1992) observed that a significant improvement of constipation in PD patients determined an improvement in extrapyramidal function, which was probably related to an increase in the levodopa absorption and bioavailability due to the augmentation in gastric emptying and in gastrointestinal motility. This could explain the beneficial ...

ENT-01 Restored Bowel Motility in Constipated Parkinson's ...

https://parkinsonsnewstoday.com/2019/09/04/enterin... ▾

Sep 04, 2019 · "We demonstrate in this study that ENT-01 can restore gastrointestinal motility in patients with PD, suggesting that a major division of the nervous system and the largest sensory organ in the body (the GI tract) is not irreversibly damaged in patients with PD, despite the long-standing constipation that might suggest otherwise," Denise Barbut, MD, said in a press release. Barbut is the study's senior ...

Parkinson's Disease

Medical Condition

A chronic and progressive movement disorder.

📊 Common (More than 200,000 cases per year in US)

👤 Often requires lab test or imaging

🔧 Treatments can help manage condition, no known cure

🕒 Can last several years or be lifelong

Parkinson's disease is caused by a loss of nerve cells in substantia nigra of the brain. This leads to a reduction in a chemical called dopamine in the brain. Many different symptoms are associated with Parkinson's disease and the more common symptoms are slowness in movement and muscle stiffness. Currently there is no cure for Parkinson's disease. But treatments are available to help relieve the symptoms and maintain quality of life. These treatments include: - Supportive therapies - such as physiotherapy - Medication - Surgery

A Study of Gastrointestinal Impairment in Parkinson's Disease

<https://www.michaeljfox.org/grant/study...> ▾

A Study of Gastrointestinal Impairment in Parkinson's Disease. Gastrointestinal (GI) symptoms, such as constipation, nausea and vomiting, are common in Parkinson's disease (PD), but the cause of these symptoms is not entirely clear. Slow movement of food through the stomach, intestine and colon is one possibility.

Constipation in chronic kidney disease: it is time to ...

<https://rrtjournal.biomedcentral.com/articles/10.1186/s41100-019-0246-3> ▾

Dec 12, 2019 · Constipation is highly prevalent in patients with chronic kidney disease (CKD) and is primarily characterized by decreased intestinal motility. This chronic disorder affects the quality of life of patients. However, nephrologist and dialysis clinicians have long had a disproportionately limited understanding of constipation. Accumulating evidence has revealed a relationship between ...
