True Recurrence Versus New Primary: An Analysis of ...

<https://www.sciencedirect.com/science/article/pii/S036030161000814X>

Oct 01, 2011 · Ipsilateral breast tumor recurrence (IBTR) can occur in 5–20% of women with early-stage breast cancer treated with breast-conserving therapy. Two entities of IBTR have been described: true recurrence (TR), suggested to be regrowth of disease at the tumor bed, and new primary (NP), distinct from the index lesion in histology and location.
