Dear Drs. Ghosh and Tarnawski,

I am writing in support of the manuscript entitled "Prediction of Hereditary Nonpolyposis Colorectal Cancer using mRNA MSH2 Quantitative and Correlation with Nonmodifiable Factors".

I have 15 years of professional scientific research experience, publishing my own findings and I am a professional copyeditor who specializes in technical, biomedical research manuscripts written by non-native English speakers. My role in this manuscript was to provide English copywriting services and general scientific review as a consultant, in collaboration with Dr. Robert Tedjasaputra in advancing the communication of his important research findings.

Please do not hesitate to contact me with concerns or comments.

Sincerely,

**Vincent Tedjasaputra, PhD**  
**Scientific Consultant**
