|   | Science Editor: Remind Revision at 2021-08-26 08:18  |       |
|---|--|-------|
|   | Company Editor-in-Chief: I have reviewed the Peer-Review   |       |
|   | Report, full text of the manuscript, and the relevant ethics   |       |
|   | documents, all of which have met the basic publishing requirements   |       |
|   | of the World Journal of Hepatology, and the manuscript is  |       |
|   | conditionally accepted. I have sent the manuscript to the author(s)  |       |
|   | for its revision according to the Peer-Review Report, Editorial  |       |
|   | Office's comments and the Criteria for Manuscript Revision by  |       |
|   | Authors. Please prepare and arrange the figures using PowerPoint   |       |
|   | to ensure that all graphs or arrows or text portions can be  |       |
|   | reprocessed by the editor.   |       |
| 3 | The fixed headings are copied.   | [V]   |
| 3 |  | [Y]   |
|   | The title concisely summarizes the main topic of the study and is  |       |
|   | not too long (no more than 18 words). Words such as 'exploration',   |       |
| 4 | 'research', 'analysis', 'observation', and 'investigation' are avoided.  | [Y]   |
|   | The title does not start with 'The' and does not include any Arabic  |       |
|   | numbers or uncommon abbreviations.   |       |
| 5 | A short running title is provided (no more than 6 words).  | [Y]   |
|   | The authors' full family (sur)names and full/abbreviated first   |       |
| 6 | names are listed on the title page and are consistent with those   | [Y]   |
|   | listed in the signed BPG Copyright License Agreement form.   |       |
| 7 | The 'Author contributions' passage describes the specific contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names. | [Y]   |
|   | e.g., "Wang CL and Liang L contributed equally to this work; Wang  |       |
|   | CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the  |       |
|   |  |       |
|   | research study; Wang CL, Zou CC, Hong F and Wu XM performed  | 2 / 9 |

|    | the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript."  |     |
|----|--|-----|
| 8  | The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors.   | [N] |
| 9  | The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title ( <i>e.g.</i> , MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.  | [Y] |
| 10 | The Manuscript Tracking information ( <i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.   | [Y] |
| 11 | The Abstract section is formatted according to the article-specific style (structured $vs$ unstructured) and word count thresholds, as follows:  Commentary, Frontier, Diagnostic Advances, Medical Ethics, Minireview, Review, Therapeutics Advances, and Topic Highlight:  Non-structured abstract that is no less than 200 words.  Field of Vision, Case Report and Letter to the Editor:  Non-structured abstract that is no less than 150 words.  Research articles: Structured abstract with subsections for AIM (no more than 20 words); METHODS (no less than 80 words); RESULTS (no less than 120 words); and CONCLUSION (no more than 26 | [Y] |

|    | words).   |     |
|----|---|-----|
|    | The 'Key words' list provides 5-10 keywords that reflect the main       |     |
| 12 | content of the study. The first letter of each keyword is capitalized,  | [Y] |
|    | and each keyword is separated by a semicolon.                           |     |
|    | The "citation" contains authors' names and manuscript title. The        |     |
|    | name of the first author should be typed in bold letters; the family    |     |
|    | (sur) name of all authors should be typed with the first letter         |     |
| ı  | capitalized, followed by their abbreviated first and middle initials.   |     |
| 13 | For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick       | [Y] |
|    | Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,         |     |
|    | Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes              |     |
|    | mellitus increases the risk of gastric cancer: A meta-analysis. World J |     |
|    | Gastroenterol 2019; In press  |     |
|    | The 'Core tip' provides a summary (less than 100 words) of the          |     |
| 14 | study that outlines the most innovative and important arguments         | [V] |
| 14 | and core contents of the paper and will serve to effectively attract    | [Y] |
|    | readers.  |     |
|    | The 'INTRODUCTION' section clearly describes the relevant               |     |
|    | background information for the study. Only the most relevant and        |     |
|    | current (within the past 5 years) literature is cited, with the         |     |
|    | exception of rare instances of seminal literature citations. All        |     |
|    | technical terms and/or abbreviations are explained and/or defined,      |     |
| 15 | with the full name of abbreviations given upon first appearance in      | [Y] |
| 13 | the text and the abbreviation presented in parentheses [i.e.,           | [1] |
|    | "computed tomography (CT)"]. First-person pronouns (e.g., 'I',          |     |
|    | 'we') are used appropriately to clearly indicate the work performed     |     |
|    | by the author(s). When weaknesses of previous studies are               |     |
|    | described in the text to highlight the innovations related to the       |     |
|    | current study, the information is presented carefully.                  |     |

| г  |   |       |
|----|---|-------|
|    | The 'MATERIALS AND METHODS' section clearly and accurately                                  |       |
| 16 | describes all materials and methods used to obtain the data                                 | [Y]   |
| 10 | presented in the article and is adequate for a reader to repeat the                         | [+]   |
|    | study.  |       |
|    | The 'RESULTS' section concisely describes the observational and                             |       |
|    | experimental results. Representative data and data that have                                |       |
|    | scientific significance are emphasized. Data is presented in either                         |       |
| 17 | the text, a table or figure (i.e., chart, diagram, graph or image), but is                  | [Y]   |
|    | not repeated among each. Information presented in the tables and                            |       |
|    | figures clearly describes the trends, meaning, and inferences.                              |       |
|    | Results described in textual form are accurate, concise and clear.                          |       |
|    | Statistical symbols are accurate. Statistical significance is expressed                     |       |
|    | as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted).    |       |
| 18 | If there are other series of <i>P</i> values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,   | [Y]   |
|    | and a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01. |       |
|    | Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.                            |       |
|    | The 'DISCUSSION' section (1) describes the main purpose and                                 |       |
|    | hypothesis of the study; (2) summarizes the most important results;                         |       |
|    | (3) illustrates and explains the results (but does not simply repeat                        |       |
| 19 | the data) and draws conclusions or inferences based on the results;                         | [ V ] |
| 19 | (4) points out the limitations of the study and their impact on the                         | [Y]   |
|    | results, as well as proposes further advice on future research                              |       |
|    | topic(s) or direction(s); and (5) describes the theoretical significance                    |       |
|    | and practical value of the findings.  |       |
|    | The 'ACKNOWLEDGEMENTS' section expresses gratitude to any                                   |       |
| 20 | individuals or organizations for technical support (i.e., providing                         |       |
|    | instrumentation, equipment or experimental materials, and/or                                | [N]   |
|    | assistance in experimental work), non-technical services (i.e., useful                      | [1/]  |
|    | inspiration, suggestions, guidance, or review), and/or any other                            |       |
|    | auxiliary work.   | _     |
|    |   |       |

| 21 | The 'ARTICLE HIGHLIGHTS' section provides comments for                   | [V]  |
|----|--|------|
| 21 | original articles in accordance with the specified format.               | [Y]  |
|    | The 'REFERENCES' section lists the references in the Vancouver           |      |
|    | style. This style uses Arabic numeral in-text citations based on the     |      |
|    | order of the first appearance of a source in the text. For citations     |      |
|    | where the author's name is indicated in the text, a superscript          |      |
|    | number should be placed following the name (i.e, "Pang et al"). For      |      |
|    | citations where no author is indicated, a superscript number should      |      |
| 22 | be placed at the end of the sentence. Respective examples are: "Ma[1]    | [Y]  |
|    | reported", "Pan et al[2-5] indicated"; "PCR has a high                   |      |
|    | sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the |      |
|    | reference number is described in the text; for example, "The             |      |
|    | experimental method used has been described in reference [8]." The       |      |
|    | style of reference citations in tables is the same as that in the text   |      |
|    | (e.g., Pan et al <sup>[2-5]</sup> , please see reference [8]).           |      |
|    | Journal references have been verified to ensure that there are no        |      |
|    | duplicate references and that the PMID numbers are correct. For          |      |
|    | references not yet included in PubMed: the name of Chinese               |      |
| 00 | journals is spelled out using Chinese Pinyin, with the first letter of   |      |
| 23 | each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of   | [Y]  |
|    | journals in other languages are listed according to indexing             |      |
|    | information retrieved from Google. Book references are presented         |      |
|    | with all the information relevant to the electronic version.             |      |
|    | The number of cited references is appropriate for the article type, as   |      |
|    | follows:   |      |
| 24 | <u>Commentary:</u> no less than 50;                                      | F3/1 |
| 24 | Review: no less than 100;  | [Y]  |
|    | Article: no less than 30/26;   | 1    |
|    | Case Report and Letter to the Editor: no less than 1.                    |      |

|    | The ethics-related statements are provided in accordance with the                         |       |
|----|---|-------|
| 25 | manuscript type (e.g., Manuscript NoInstitutional review board                            | [Y]   |
|    | statement, Manuscript NoAnimal care and use statement, etc.).                             |       |
|    | The names of the peer reviewers and the scientific editor are present                     |       |
| 26 | at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang                         | [Y]   |
|    | JL).  |       |
|    | The order and numerical labeling of tables and figures is consistent                      |       |
|    | with their appearance and presentation in the text. Symbols in                            |       |
|    | tables (e.g., +, -, $\times$ , $\div$ , *) correctly correspond to the definitions in the |       |
| 07 | footnotes. Only one legend is provided for each multi-panel figure                        | F3/1  |
| 27 | consisting of color graphs, black and white graphs, or line graphs                        | [Y]   |
|    | that depicts data of the same theme. For example: Figure 1                                |       |
|    | Pathological changes in atrophic gastritis tissue before and after                        |       |

|    | diagrams, PCR amplification curves, and survival curves.                                  |       |
| 29 | The author(s) highlighted the changes made to the manuscript                              | []/[] |
| 29 | according to the peer-reviewers' comments.  | [Y]   |
| 20 | The responses to the peer-reviewers' comments are consistent with                         | []/[] |
| 30 | the changes made to the manuscript.   | [Y]   |
