## PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 80024

Title: Pulmonary sarcoidosis: A novel sequelae of drug reaction with eosinophilia and

systemic symptoms: A case report

Provenance and peer review: Unsolicited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05394499 Position: Peer Reviewer Academic degree: PhD

**Professional title:** Doctor

Reviewer's Country/Territory: Germany

Author's Country/Territory: China

Manuscript submission date: 2022-09-14

Reviewer chosen by: AI Technique

Reviewer accepted review: 2022-09-14 21:27

Reviewer performed review: 2022-09-15 01:26

statements Conflicts-of-Interest: [ ] Yes [Y] No

## SPECIFIC COMMENTS TO AUTHORS

Dear Authors, this is a well-written manuscript with an interesting message to deliver. The diagnostic work-out and intellectual background of your case support the conclusion that the pulmonary sarcoidosis was interestingly connected to DRESS syndrome after allopurinol administration. Best Regards

## SPECIFIC COMMENTS TO AUTHORS

The authors have reported a case of pulmonary sarcoidosis secondary to Allopurinol induced DRESS- the authors should be commended on approaching this rare but important clinical entity. The article flows well on the whole with enhancement from clinical and pathological images. It may be worthwhile to have a brief discussion of differential diagnoses of non-caseating granulomas included within the case. Would politely remind the authors to adhere strictly to scientific writing to avoid losing the impact of their article. 'At a follow-up of 6 months after the treatment withdrawal, the patient's situation stayed stable and he was satisfied with the results of the treatment.' could be rewritten as Following a 6-month follow-up of completion of treatment, the patient's clinical condition remained stable with no clinical evidence of relapse. The initial results with follow-up results could be tabulated to make it easier for the reader to follow. Was ACE levels measured and/or monitored? Kindly include this.
