2 Revision has been made according to the suggestions of the reviewers:

Reviewer # 159131:

- 1) It was stated by the reviewer that the abstract and discussion are too long with clear redundancy in the text. This was addressed and several statements that we felt were redundant were deleted.
- 2) This corresponded to deleting some references, bringing the number to 64 instead of 73.
- 3) Figure 1 was deleted as it was not from our patients, another comment that was made by the reviewer.
- 4) The authors felt that this is the best format and style this manuscript could be written and therefore this was not changed.
