

April 20, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 17161-revised.doc).

Title: Neuromuscular Control and Rehabilitation of the Unstable Ankle

Author: You-jou Hung

Name of Journal: World Journal of Orthopedics

ESPS Manuscript NO: 17161

The manuscript has been improved according to the suggestions of reviewers:

1. Format has been updated
2. Revision has been made according to the suggestions of the reviewer:
 - (1) Reviewer 03065825 suggested adding more details on the most significant articles (eg, Konradsen et al 1997) referenced in the manuscript. More details were added to describe the study by Konradsen et al (1997) in the "Initial Ankle Sprain" section and the study by Witchalls et al (2014) in the "Recurrent Ankle Sprain" section. Due to the large number of articles referenced in this review, it may not be appropriate to describe too many experiments in great details.
 - (2) Reviewer 00728561 suggested adding more references published in the past 2 years. Two articles (both published in 2014) that are closely related to the focus (neuromuscular control of the ankle joint) of this mini-review were added to the manuscript.
 - (3) Reviewer 03065895 requested no further revision.
3. References and typesetting were corrected.

Thank you very much for publishing my manuscript in the World Journal of Orthopedics.

Sincerely yours

You-jou Hung, PT, MS, PhD, CSCS
