Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 17328-edited.doc).

Title: Laser assisted periodontics - a review of the literature

Author: : Bouhout Youssef DDS, Reginaldo Bruno Gonçalves DDS, MSD, PhD, Dip ABP, FRCD(C)

Name of Journal: World Journal of Stomatology

ESPS Manuscript NO: 17328

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) The first suggestion was to reorganize the manuscript by separating the pros and inconvenients of lasers in periodontics to enable better understanding and focus of the article. We have tried to divide as much as we could to discussion in two parts as suggested by the reviewer.

(2) The authors are consient that systematic reviews nowadays are considered "scientifically more reliable". However this article had been proposed and written as a review of literature, and not a systematic review. It was not our objective when we wrote the article to do a systematic review so we would like keep our article as initial proposed and that the merit of the information presented be judge as a traditional review of the literature

3 References and typesetting were corrected

Thank you again for consider our manuscript in the World Journal of Stomatology

Sincerely yours,

Dr. Reginaldo Bruno Gonçalves DDS, MSD, PhD, Dip ABP, FRCD(C)

Professeur titulaire en parodontie et implantologie

Directeur, programme de spécialisation en Parodontie

Faculté de médecine dentaire, Université Laval, Québec, Canada.
