

Dear reviewer No. 2702057

Name of journal: World Journal of Orthopedics

ESPS Manuscript NO: 18475

1. Thank you for reviewing our manuscript.

The present article is the narrative review, so we added some information in the 'Introduction' section.

For this review, we searched the key words "hip cyst" or "hip ganglion" or "hip bursa" using PubMed (National Library of Medicine, Bethesda, Maryland, USA) to obtain the articles published until December 2014. 1056 articles from the key word 'hip cyst,' 134 from 'hip ganglion,' and 239 from 'hip bursa' were matched, respectively. All selected abstracts or articles were reviewed by the authors and articles without an English abstract that were not published in English were excluded. As a result searched with PubMed, total 151 articles were considered to be relevant for this review. Furthermore, we added the 140 related articles using the references of the articles, which is selected by PubMed, and finally 291 articles about cystic lesion around the hip were collected. The objective of the present article is to provide an overview of the clinical features of cystic lesions around the hip joint.

2. Furthermore, we added some sentences in the manuscript. They are labeled yellow.
