

## Format for ANSWERING REVIEWERS

**Title:** PREVALENCE OF ADENOVIRUS AND ROTAVIRUS INFECTION IN IMMUNOCOMPROMISED PATIENTS WITH ACUTE GASTROENTERITIS IN PORTUGAL

**Author:** Joana Ribeiro, Delfim Ferreira, Célia Arrabalde, Sandra Almeida, Inês Baldaque, Hugo Sousa

**Name of Journal:** *World Journal of Virology*

**ESPS Manuscript NO:** 19437

July 17, 2015

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 19437-FINAL.docx). The manuscript has been corrected according to the suggestions of reviewer and editor.

### EDITOR SUGGESTIONS

**All modifications were marked in the manuscript in yellow.**

### REVIEWER 1

*Comments: This is an interesting study on the cause of diarrhea by viral agents. The study is well-designed and the manuscript is well-written. One question is if not more data of patients could have been acquired within the indicated time frame. Another question is if the immunocompromised patients suffered only from malignancies and if data from other patient cohorts are available, for example transplant patients or patients with diabetes.*

*Thank you for your comment. All patients included in this study are immunocompromised patients with haematological malignancies, of which some have had been submitted to stem cell transplantation.*

### REVIEWER 2

*No comments.*

Sincerely yours,

A handwritten signature in black ink, appearing to be 'Hugo Sousa', written over a horizontal line.

Hugo Sousa, MD, PhD
