### Answering reviewers

I wish to thank your valuable comments on my paper

Q1. Regarding epidemiology, as the disease results from viral infection, geographical distribution, source of infective agents, any seasonal variation, and ethnic-social association might interest the readers.

A1. We add patient numbers of countries from which reported. We cannot analyze seasonal variation and ethnic-social association of B19 encephalitis because this information did not report in most papers.

Q2. Regarding imaging characteristics, if the authors have some from their own case that may depict typical radiologic feature, it may help the reader understand more clearly.

A2. Our patients with B19 encephalitis and encephalopathy did not show any abnormal findings on brain CT nor brain MRI. Therefore, I cannot provide typical radiologic feature in the text.

Q3. Some typing errors.

A3. We correct these typing errors pointed out by the reviewer.
