

Dear Editor,

We would like to thank you for the response on our manuscript “Long-Term Results after Revisions for Failed Vertical Banded Gastroplasty” (21241).

We have made the necessary adjustments to our manuscript, which are marked red in the main revised manuscript document.

We have added the necessary statements to the main document. Furthermore, we have added the comments section, adjusted the abstract to the required format, added the Core tip and changed the format of the references in the manuscript to the requested font (superscript in square brackets, DOI and PMID).

Finally, we have added separate files containing a signed conflict of interests statement (no conflict of interest to account for), the Copyright Assignment and Audio Core Tip

We are grateful for the opportunity to revise our manuscript and would like to thank you in advance for your effort.

Yours sincerely,

Martin van Wezenbeek
