

Response to reviewer's comments

Dear Editor

The revised form of the manuscript entitled "Surgical dilemmas in the management of colorectal liver metastases: the role of timing" with No 25112 is resubmitted for publication.

The revision is performed according to the general comments of the reviewers. Especially we include the general directions for current clinical status and future research directions according to the suggestions of the second reviewer.

Thanking you in advance

D. Dimitroulis

Ass Prof of Surgery
