Response to Reviewer Comments

Name of journal: World Journal of Orthopedics

Manuscript NO.: 25760

To whom it may concern:

We would like to thank the Reviewers and Editor for reading and revising our submission. It is our hope that with the revisions our manuscript will contribute to the literature concerning surgical management of Lenke 5 scoliosis. We have provided an itemized, point-by point response to each reviewer below:

Reviewers' comments:

Reviewer #1:

Interesting Paper that compares two different approaches for surgical correction of Lenke %C scoliosis by selective fusion. The problem is the method of selection the patients to be included in the anterior vs. posterior GROUP.

RESPONSE: Thanks for your response. The study is a retrospective analysis of a multicenter database. The surgical approach was guided by individual surgeon's preference (Page 4, line 77-79).

Reviewer #2: good study

RESPONSE: Thanks for your comments.

Thank you for the opportunity to revise our submission.

Respectfully,

The Authors
