

Dear peer reviewer No.00036328,

Thank you for your suggestions for our manuscript 'Current understanding concerning intestinal stem cells', by Shuang Cui and Pengyu Chang, to be submitted as a review article. We believe the quality of this manuscript will be improved after revision according to your suggestions. As a major point, you believed the English language in previous form was hard to follow. To solve this problem, we have asked the NPG language editing team to edit the English language. And two spelling faults have been corrected. All modified information are labeled using red font.

Sincerely yours,

Peng-Yu Chang on behalf of all authors.
