Dear Lian-Sheng Ma,
President and Company Editor-in-Chief
Baishideng Publishing Group Inc

Please find attached the reviewed version of our manuscript entitled "*Therapeutic alternatives for the treatment of type 1 hepatorenal syndrome: A Delphi technique -based consensus*" which we are submitting for publication in **World Journal of Hepatology**.

We thank the Editors and the Reviewers for their positive comments on our manuscript. Based on their suggestions, the manuscript has been revised. We think that the consequent changes definitively improved the quality of the manuscript.

Our point-by-point responses to each point raised by the reviewers are presented below. As authors, we found that **World Journal of Hepatology** is perfectly suited for the dissemination of our work among the world gastroenterological community. We assure that neither the submitted material nor portions thereof have been published previously or are under consideration for publication elsewhere.

We look forward to hearing about the editorial decision on this manuscript.

Sincerely yours,

Carlos Benítez, M.D.

RESPONSE TO REVIEWERS' COMMENTS

RESPONSE TO EDITOR:

We made all the format changes, including references and audio core tip. In the Supportive foundations section, we acknowledge our scientific Societies but we don't have a grant number.

REVIEWER #1:

This is a well written interesting well balanced and important review on a severe disease such as hepato-renal syndrome.

Response: We thank the reviewer for his/her commentaries on our paper.

REVIEWER #2:

The article entitled "Therapeutic alternatives for the treatment of type 1 hepatorenal syndrome: A Delphi technique -based consensus" is a very informative article about hepatorenal syndrome. It is well written and I think it will guide the clinicians. However I want to point just one clerical error: The fourth sentence of introduction section is "Table 1 depicts the diagnostic criteria proposed by the Ascites Club for the diagnosis of HSR". Abbreviation HSR should be spelled correctly.

Response: We thank the reviewer for his/her commentaries on our paper.

1) We've corrected that misspelling.

REVIEWER #3:

The study is well organized and properly processed. The conclusion is reasonable.

Response: We thank the reviewer for his/her commentaries on our paper.
