COMMENTS TO AUTHORS

The authors investigated increased lung cancer in patients with CTA for EVAR planning. Some problems existed. 1. Abstract: What does 10 p/y mean? 2. Key words: Please use computed tomography instead of CT. 3. Conclusion in the text: When making a summary or conclusion, please do not use citations. If you want to cite others’ work, it means you have not finished the discussion. Once you finish the discussion and want to make a conclusion, it means you only make a summary of what you have discussed. No citations. 4. Limitations of the study: In this study, the authors put “limitations” behind the CONCLUSION, which is not correct. The limitations should be put before the CONCLUSION. 5. A few language mistakes existed in the text.
