### COMMENTS TO AUTHORS

The authors demonstrated the possible role of LIGHT in stimulating osteoclast function in SF macrophages. This type of activity was enhanced in combination of RANKL and M-CSF. Overall, the paper is logical and well-organized. One minor point: Figure 1A contains two pictures and it is not stated which is which in figure legend. The length of the scale bar also needs to be stated in the legend.

### COMMENTS TO AUTHORS

two areas need comment: 1. source and character of the dentine slices 2. where are the blocking studies?
